Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author s personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt s endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2 5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

Beyond Myalgic Encephalomyelitis/Chronic Fatigue Syndrome Institute of Medicine, Board on the Health of Select Populations, Committee on the Diagnostic Criteria for Myalgic Encephalomyelitis/Chronic Fatigue Syndrome, 2015-03-16 Myalgic encephalomyelitis ME and chronic fatigue syndrome CFS are serious debilitating conditions that affect millions of people in the United States and around the world ME CFS can cause significant impairment and disability Despite substantial efforts by researchers to better understand ME CFS there is no known cause or effective treatment Diagnosing the disease remains a challenge and patients often struggle with their illness for years before an identification is made Some health care providers have been skeptical about the serious physiological rather than psychological nature of the illness Once diagnosed patients often complain of receiving hostility from their health care provider as well as being subjected to treatment strategies that exacerbate their symptoms Beyond Myalgic Encephalomyelitis Chronic Fatigue Syndrome proposes new diagnostic clinical criteria for ME CFS and a new term for the illness systemic exertion intolerance disease SEID According to this report the term myalgic encephalomyelitis does not accurately describe this illness and the term chronic fatigue syndrome can result in trivialization and stigmatization for patients afflicted with this illness Beyond Myalgic Encephalomyelitis Chronic Fatigue Syndrome stresses that SEID is a medical not a psychiatric or psychological illness This report lists the major symptoms of SEID and recommends a diagnostic process One of the report's most important conclusions is that a thorough history physical examination and targeted work up are necessary and often sufficient for diagnosis The new criteria will allow a large percentage of undiagnosed patients to receive an accurate diagnosis and appropriate care Beyond Myalgic Encephalomyelitis Chronic Fatigue Syndrome will be a valuable resource to promote the prompt diagnosis of patients with this complex multisystem and often devastating disorder enhance public understanding and provide a firm foundation for future improvements in diagnosis and treatment **Students of Color and the**

Achievement Gap Richard R. Valencia, 2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar

Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective, and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12 education. *Students of Color and the Achievement Gap* makes a persuasive and well-documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political, economic, and cultural frameworks.
