\_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice\_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *The Digital Age Detective* Brendan Riley,2017-07-05 Imagining the figure of the fictional detective as an archetype in the study of modern culture the author argues that contemporary detective fiction can help us better comprehend fundamental shifts of the Digital Age in communication family entertainment society even the way we think as individuals The nature of the detective story itself models how we build and share knowledge Drawing on concepts from literature and media studies the author reveals clues about modern phenomena like conspiracy theory groupthink and the nature of our digital identities Jonathan Lethem James Peacock,2013-07-19 Jonathan Lethem is the first full length study dedicated to the work of an exciting genre busting contemporary writer with an increasingly high profile in American literature Examining all of Lethem s novels as well as a number of his short fictions essays and critical works this study shows how the author s prolific output his restlessness and his desire always to be subverting literary forms and genres are consistent with his interest in subcultural identities The human need to break off into small groupings subcultures or miniature utopias is mirrored in the critical tendency to enforce generic boundaries To break down the boundaries between genres then is partly to make a nonsense of critical distinctions between high and low literature and partly to reflect the wider need to recognise difference to appreciate that other people no matter how outlandish and alien they may appear share similar desires experiences and problems With this in mind James Peacock argues that Lethem s experiments with genre are not merely games or elaborate literary jokes but ethical necessities particularly when viewed in the light of the losses and traumas that shadow all of his writing Jonathan Lethem therefore makes an important contribution not just to Lethem studies but also to debates about genre and its position in postmodern or post postmodern literature It will be of interest to all scholars and students of contemporary American writing as well as those interested in genre fiction and literature s relationship with subcultures **Furry Planet** Joe Strike,2023-08-29 From a veteran fur comes an immersive entry into the world of furry fandom with an inside look at an amazing subculture the timeless human instinct to identify with animals and color images of furry costumes art and conventions Furs are the creative subculture of people who identify with animals You can find them at furry conventions furfests around the world tens of thousands of people donning their most elaborate fursuit In costume at conventions with friends or alone furries unleash the animal within letting their inner beasts roar and their inner cats purr aware of the power and joy to be found in bringing forward one s animal side and encouraging others to do the same In *Furry Planet* long time furry Joe Strike dives deep into this compelling subculture to share its appeal
