Fred Zinnemann and the Cinema of Resistance J.E. Smyth, 2014-02-06 A compelling history of the director s films of war and resistance Cinema and Unconventional Warfare in the Twentieth Century Paul B. Rich, 2018-08-23 Cinematic representations of unconventional

warfare have received sporadic attention to date. However, this pattern has now begun to change with the rise of insurgency and counter insurgency in Iraq and Afghanistan and the growing importance of jihadist terrorism in the wake of 9 11. This ground breaking study provides a much needed examination of global unconventional warfare in 20th century filmmaking with case studies from the United States, Britain, Ireland, France, Italy, and Israel. Paul B. Rich examines Hollywood's treatment of counter terrorism and counter insurgency in the United States, British post colonial insurgencies in Malaya and Kenya, and British special operations in the Second World War, the Irish conflict before and during the Troubles, French filmmaking and the reluctance to deal with the bitter war in Algeria in the 1950s, Italian neorealism and its impact on films dealing with urban insurgency by Roberto Rossellini, Nanni Loy, and Gillo Pontecorvo, and Israel and the upsurge of Palestinian terrorism. Whilst only a small number of films on these conflicts have been able to rise above stereotyping insurgents and terrorists, in some cases due to a pattern of screen orientalism, Cinema and Unconventional Warfare in the Twentieth Century stresses the positive political gains to be derived from humanizing terrorists and terrorists' movements, especially in the context of modern jihadist terrorism. This is essential reading for academics, postgraduates, and advanced undergraduates interested in 20th century military history, politics, and international relations, and film studies.

Film Style and the World War II Combat Genre Stuart Bender, 2014-08-11. Film Style and the World War II Combat Genre is a detailed examination of the stylistic means by which filmmakers depict stories of combat. The work furthers contemporary discussions by analyzing a range of World War II combat films to a degree of detail which has previously escaped critical attention. This substantial examination of cinematography, sound editing, and acting in a range of movies including Saving Private Ryan, Windtalkers, Bataan, and Objective Burma demonstrates the importance of close attention to the textual construction of these films, specifically as well as cinematic texts more generally. The work advances the original analytic descriptions of controlled spontaneity and reported realism as theoretical concepts which explain why viewers regard certain stylistic techniques as realistic. This notion of realism is then further understood through reference to a body of research in cognitive psychology to argue that the density of audio visual information in contemporary combat films is a significant factor in creating a sense of realism.

The Espionage Filmography Paul Mavis, 2015-06-08. From Sean Connery to Roy Rogers, from comedy to political satire, films that include espionage as a plot device run the gamut of actors and styles. More than just spy movies, espionage films have evolved over the history of cinema and American culture from stereotypical foreign spy themes to patriotic star features to the Cold War plotlines of the sixties and most recently to the sexy slick films of the nineties. This filmography comprehensively catalogs movies involving elements of espionage. Each entry includes release date, running time, alternate titles, cast, and crew, a brief synopsis, and commentary. An introduction analyzes the development of these films and their reflection of the changing culture that spawned them.
