Of Rainfalls and Disasters Juan Manuel Rodríguez Esteves , Disasters associated with natural phenomena such as earth quakes floods droughts etcetera are intensifying damages that translate into deaths the loss of infrastructure and the interruption of economic activities The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards leaving society increasingly exposed due to a mismanagement of land Since the 1990s the social sciences have developed the approach of vulnerability which considers the conditions of weakness of a society to cope with hazards We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place The aim of this work is to show how the risk of flood disasters is constructed in Tijuana Baja California with four main elements as our starting point An examination of floods since the late 19th century the voice of the actors present for flooding events a theoretical model to understand the relationship between the hazard and the magnitude of the risk and recommendations for disaster risk management at a local level

The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system *The Future of Disaster Management in the U S* will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels

Fourteeners Sarah Latchaw, 2020-02-14 Life and love are more brutal than the crackled ice of a Rocky Mountain fourteenner That's what thrill seeker Kaye Trilby believed until a deadly avalanche almost swept her from the face of the earth Now tackling life and love with her ex husband isn't as traumatic as scaling the mountains she once longed for Or is it Kaye has loved the brilliant and guarded Samuel Cabral since childhood and at last he's allowed her behind his carefully cultivated veneer But so much has changed in the years they lived apart Kaye worries she may never fully know him Why is Samuel firmly against becoming a father Who is this mysterious woman in Mexico and why is she a secret While Samuel chases ghosts through the lush hills of Tamaulipas Kaye chases the woman she once was up the peaks of Colorado's gleaming fourteeners In the end is it possible Kaye and Samuel are chasing separate futures With this life affirming and personal novel Sarah Latchaw returns with a stunning multifaceted conclusion to her Hydraulic series Fourteeners is a grown up story of first love and second chances

Self-Defense in Mexico Luis Hernández Navarro, 2020-03-02 In Mexico and across other parts of Latin America local Indigenous peoples have built community policing groups as a means of protection where the state has limited control over and even complicity in crime and violence Luis Hernández Navarro a leading Mexican journalist offers a riveting investigation of these armed self defense groups that sprang up around the time of the 1994 Zapatista uprising in Chiapas Available in English for the first time the book spotlights

the intense precarity of everyday life in parts of Mexico Hernández Navarro shows how the self defense response which now includes wealthier rancher and farmer groups is being transformed by Mexico's expanding role in the multibillion dollar global drug trade by foreign corporations extraction of raw minerals in traditionally Indigenous lands and by the resulting social changes in local communities But as Hernández Navarro acknowledges self defense is highly controversial Community policing may provide citizens with increased agency but for government officials it can be a dangerous threat to the status quo Leftists and liberals are wary of how the groups may be linked to paramilitary forces and vulnerable to manipulation by drug traffickers and the government alike This book answers the urgent call to understand the dangerous complexities of government failures and popular solutions

Crisis and Migration Anna Lindley, 2014-07-11 Crisis and migration have a long association in popular and policy discourse as well as in social scientific analysis Despite the emergence of more nuanced and even celebratory accounts of mobility in recent years there remains a persistent emphasis on migration being either a symptom or a cause of crisis Moreover in the context of a recent series of headline hitting and politically controversial situations terms like migration crisis and crisis migration are acquiring increasing currency among policy makers and academics Crisis and Migration provides fresh perspectives on this routine association critically examining a series of politically controversial situations around the world Drawing on first hand research into the Arab uprisings conflict and famine in the Horn of Africa cartel violence in Latin America the global economic crisis and immigration crises from East Asia to Southern Africa to Europe the book's contributors situate a set of contemporary crises within longer histories of social change and human mobility showing the importance of treating crisis and migration as contextualised processes rather than isolated events By exploring how migration and crisis articulate as lived experiences and political constructs the book brings migration from the margins to the centre of discussions of social transformation and crisis illuminates the acute politicisation and diverse spatialisations of crisis migration relationships and urges a nuanced cautious and critical approach to associations of crisis and migration
