The Oryx Resource Guide to El Niño and La Niña Bloomsbury

Publishing,2002-05-30 Fish die Seagulls starve Economies wither And that s just in the coastal villages El Ni o The Christ Child and its climatological opposite La Ni a are global events so powerful and strange they virtually have personalities Many remember the El Ni o seasons of 1982 83 and 1997 98 which brought floods tornadoes droughts and snow to unusual locales Increased study of these Tropical Pacific phenomena also known as ENSO the El Ni o and Southern Oscillation has now enabled scientists to predict the ENSO state as much as 12 to 18 months in advance and has helped to shape weather prediction in general Here the basic causes and effects of El Ni o and La Ni a are carefully chronicled for anyone in search of accurate and current information on these natural phenomena Chapters are devoted to the history of ENSO its influence on global weather and on the United States including the ecosystem and how governments and industries worldwide are utilizing new weather data to harness ENSO s economic impact rather than be saddled by it A chronology tours key events from the 15th century diary observations of colonists in Ecuador and Peru to recent events like the devastating El Ni o of 1997 98 which was responsible for 23 000 deaths and 33 billion in damages Biographies of important researchers illustrations and maps and an extensive bibliography help make this a total guide to these magnificent natural cycles

Necrogeopolitics Caroline Alphin, François Debrix, 2019-10-08 Necrogeopolitics On Death and Death Making in International Relations brings together a diverse array of critical IR scholars political theorists critical security studies researchers and critical geographers to provide a series of interventions on the topic of death and death making in global politics Contrary to most existing scholarship this volume does not place the emphasis on

traditional sources or large scale configurations of power force leading to death in IR Instead it details theorizes and challenges more mundane perhaps banal and often ordinary modalities of violence perpetrated against human lives and bodies and often contributing to horrific instances of death and destruction Concepts such as slow death soft killing superfluous bodies or extra ordinary destruction disappearance are brought to the fore by prominent voices in these fields alongside more junior creative thinkers to rethink the politics of life and death in the global polity away from dominant IR or political theory paradigms about power force and violence The volume features chapters that offer thought provoking reconsiderations of key concepts theories and practices about death and death making along with other chapters that seek to challenge some of these concepts theories or practices in settings that include the Palestinian territories Brazilian cities displaced population flows from the Middle East sites of immigration policing in North America and spaces of welfare politics in Scandinavian states

The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

State of Disaster Maria Cristina Garcia, 2022-08-10 Natural disasters and the dire effects of climate change cause massive population displacements and lead to some of the most intractable political and humanitarian challenges seen today Yet as Maria Cristina Garcia observes in this critical history of U S policy on migration in the Global South there is actually no such thing as a climate refugee under current U S law Most initiatives intended to assist those who must migrate are flawed and ineffective from inception because they are derived from outmoded

policies In a world of climate change U S refugee policy simply does not work Garcia focuses on Central America and the Caribbean where natural disasters have repeatedly worsened poverty inequality and domestic and international political tensions She explains that the creation of better U S policy for those escaping disasters is severely limited by the 1980 Refugee Act which continues to be applied almost exclusively for reasons of persecution directly related to politics race religion and identity Garcia contends that the United States must transform its outdated migration policies to address today s realities Climate change and natural disasters are here to stay and much of the human devastation left in their wake is essentially a policy choice
