The Caribbean Hurricane Experience

Hurricanes are a fact of life in the Caribbean (See [Appendix I](#)). Within the past nine years, from 1988 through 1997, several hurricanes have unleashed their fury on the islands of the Caribbean. Hurricanes David in 1979, Allen in 1980, Gilbert in 1988, Hugo in 1989 and Luis and Marilyn in 1995 caused significant damage to hotels in Dominica, St. Lucia, Jamaica, Montserrat, Antigua,

Powerless Diana Hernández, Jennifer Laird, 2025-04-08 Energy serves as the lifeblood of our daily experiences. It permeates virtually every aspect of our existence, facilitating nourishment, safety, and productivity. When affordability threatens energy's availability, a family's living situation can become untenable: too cold, too hot, too dark, and too often unhealthy and unsafe. In *Powerless*, sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity: the inability to adequately meet household energy needs. Approximately one in ten households in the U.S. are energy insecure, and four in ten are at risk for energy insecurity. These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions. Drawing on survey data and interviews with one hundred energy-insecure individuals and families, Hernández and Laird detail the experience of energy insecurity. Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills, utility debt, and disconnection from utility services. They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems. They are often forced to make difficult choices about what bills to pay. These decisions are sometimes referred to as "heat or eat" choices, as families cannot afford to pay for heating and food at the same time. Energy-insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices. This includes deliberate underconsumption of energy, enduring physical discomfort, and using dangerous alternatives such as open flames, ovens, or space heaters to try to maintain a comfortable temperature in their home. To be energy insecure is to suffer. Despite the heavy toll of energy insecurity, most people confront these difficulties behind closed doors, believing it is a private matter. Thus, the enormous social crisis of energy insecurity goes unnoticed. Hernández and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent, safe, clean, and affordable energy. Their proposals include improving the current energy safety net, which is limited and often does not serve the most energy-insecure due to stringent program requirements and administrative burdens. They also suggest redesigning rates to accommodate income, promoting enrollment, and expansion of discount programs, reforming utility disconnection policies, improving energy literacy, and ensuring an equitable shift to renewable energy resources. *Powerless* creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality.

The Future of Disaster Management in the U.S. Amy LePore,2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

Parenting Empires Ana Y. Ramos-Zayas,2020-03-27 In Parenting Empires Ana Y Ramos Zayas focuses on the parenting practices of Latin American urban elites to analyze how everyday experiences of whiteness privilege and inequality reinforce national and hemispheric idioms of anti corruption and austerity Ramos Zayas shows that for upper class residents in the affluent neighborhoods of Ipanema Rio de Janeiro and El Condado San Juan parenting is particularly effective in providing moral grounding for neoliberal projects that disadvantage the overwhelmingly poor and racialized people who care for and teach their children Wealthy parents in Ipanema and El Condado cultivate a liberal
