The Industrial Revolution

Historical Context:

The Industrial Revolution which began in England in the late 1700's had a wide range of positive and negative effects on the economic and social life of the people of England. These results have been interpreted from a variety of perspectives--the factory workers, the factory owners, the government, and others who observed the conditions in industrial cities at the time.

Document 1

The following is an excerpt from William Cooper's testimony before the Sadler Committee in 1832. The committee, led by Michael Sadler, investigated working conditions in factories and mills.

Sadler: What is your age?

Cooper: I am eight and twenty.

Sadler: When did you first begin to work in the mills?

Cooper: When I was ten years of age.

Sadler: What were your usual hours of working?

Cooper: We began at five in the morning and stopped at nine in the night.

Sadler: What time did you have for meals?

Cooper: We had just one period of 40 minutes in the 16 hours. That was at noon.

Sadler: What means were taken to keep you awake and attentive?

Cooper: At times we were frequently strapped (whipped).

Sadler: When your hours were so long, did you have time to attend school?

Cooper: We had no time to go to school.

Sadler: Can you read and write?

Cooper: I can read, but I cannot write.

Describe work conditions in the factory based on the testimony.

How did the Industrial Revolution affect children working in the mills?
