

### Important Operating Considerations for Safety

- Place the projector in a horizontal position no greater than 15 degrees off axis.
- Locate the projector in a well-ventilated area without any obstructions to intake or exhaust vents. Do not place the projector on a table with an other wall covering that may block the vents.
- Locate the projector at least 15 ft away from any heating or cooling vents.
- Use only factory-approved ceiling mounts.
- Use only the power cord provided. A surge-protected power strip is recommended.
- Refer to the manual for proper startup and shutdown procedures.
- In the unlikely event of the lamp rupturing, do not use visible flames placed in the surrounding area and thoroughly clean the area along all sides of the projector. Wash hands after cleaning the area and handling the ruptured lamp. This product has a lamp which contains a very small amount of mercury. If you are at all concerned by health risks or federal environmental regulations for more information see [www.cercla.org](http://www.cercla.org).

Follow these instructions to help ensure longer quality and lamp life over the life of the projector. Follow to follow these instructions may affect the warranty. For complete details of the warranty, see the Warranty section at the end of this User's Guide.

The ventilation slats or grills in the bottom of the area along the back of the projector for cooling must remain clear. This area should be kept clear.
