**Annual Review of Information Science & Technology** Blaise Cronin, 2006-10 ARIST published annually since 1966 is a landmark publication within the information science community. It surveys the landscape of information science and technology providing an analytical, authoritative and accessible overview of recent trends and significant developments. The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives. While ARIST continues to cover key topics associated with classical information science e.g. bibliometrics, information retrieval, editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities.

*The Economics of Open Access* Thomas Eger, Marc Scheufen, 2018-06-29 Addressing the recent debate on how the future of academic publishing might look in a purely digital environment, this book analyzes the experiences of researchers with as well as attitudes towards Open Access (OA) publishing. Drawing on a unique in-depth survey with more than 10 000 respondents from 25 countries, Thomas Eger and Marc Scheufen discuss their findings in the light of recent policy attempts which have been trying to foster OA, revealing considerable shortcomings and lack of knowledge on fundamental features of the academic publishing market.

*Multidimensional Journal Evaluation* Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

**Pathways to International Publication in the Social Sciences** Insung Jung, 2025-01-20 This guide offers a clear step-by-step approach for graduate students and early career researchers, especially non-native English speakers seeking to publish in international journals in

the social sciences It provides practical strategies for preparing submitting and refining research papers helping researchers navigate the challenges of academic publishing With 21 chapters the guide covers every stage of writing revising and submission while addressing the unique obstacles faced by non native English speakers The guide helps researchers identify reputable journals avoid predatory ones and use digital tools to meet international standards It then provides a structured roadmap that simplifies the publication process covering steps like journal selection writing compelling abstracts and drafting the methods and results sections By the end of the guide it is expected that researchers will have a strong first draft or ideally a submission ready manuscript The guide also addresses language barriers cultural differences and unfamiliarity with international conventions It offers practical solutions for improving English writing utilizing digital tools responding to peer reviews and managing revisions effectively It emphasizes ethical guidelines like avoiding plagiarism properly crediting co authors and ensuring research transparency to help researchers meet global standards Unlike other research guides this one is specifically tailored to early career and non native English researchers working in social science disciplines It offers practical strategies and real world examples to equip researchers and teachers of research methods and academic writing with a framework for achieving publishing success in global academia

### **Qualitative Methodologies in Tourism Studies**

Milka Ivanova,Dorina-Maria Buda,Elisa Burrai,2022-09-05 Disruptive and creative research methodologies proposed in this book are designed to dismantle neoliberal narratives deployed in tourism studies and wider social sciences Progressing criticality in tourism studies this volume showcases cutting edge contributions ranging from reflexivity subjectivities and dreams to messy emotions in auto ethnographic accounts of fieldwork motherhood capital accessing Inuit communities collective memory work ethnodrama and creative non fiction amongst others Disruption and creativity are the two ideas around which tourism geographers challenge and begin dismantling hegemonic ideologies in tourism studies The chapters in this book provide a vantage point from where to disrupt first before tourism geographers can engender progress and transformation within and outside of the field In tourism studies in general and tourism geography in particular the years of the 2000s have witnessed an emphasis on qualitative methodological research both in terms of the topics addressed and the types of methodological tools In many ways this legitimisation of qualitative work mirrors developments in other areas such as human geography sociology and anthropology in which this book is anchored The authors debate in more depth how tourism studies offer multidimensional multilogical and multi emotional approaches to research design The chapters were originally published as a special issue of the journal Tourism Geographies

*Handbook of Bibliometric Indicators* Roberto Todeschini,Alberto Baccini,2016-05-04 At last the first systematic guide to the growing jungle of citation indices and other bibliometric indicators Written with the aim of providing a complete and unbiased overview of all available statistical measures for scientific productivity the core of this reference is an alphabetical dictionary of indices and other algorithms used to evaluate the importance and impact of researchers and their institutions In 150 major articles the authors describe

all indices in strictly mathematical terms without passing judgement on their relative merit From widely used measures such as the journal impact factor or the h index to highly specialized indices all indicators currently in use in the sciences and humanities are described and their application explained The introductory section and the appendix contain a wealth of valuable supporting information on data sources tools and techniques for bibliometric and scientometric analysis for individual researchers as well as their funders and publishers

**Science Dynamics and Research Production** Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative
