is to explore the opportunities and dilemmas which business decision makers face when attempting to reconcile their organisation's interests with those of other stakeholder groups. In this intensely debated field it focuses on the power of entrepreneurial purpose and the opportunities which emerge when corporate choices and actions are driven by connected stakeholder interests. A case study of the pharmaceutical industry in the UK and Germany is presented to reveal how decision makers in this particular sector are responding to their context specific management challenges. The research findings are subsequently employed to examine and revise a pre specified stakeholder management framework which was previously developed by the author. The proposed updated framework is the book's main conceptual contribution. By depicting a set of inclusive integrated and inter related steps it is intended to provide an innovative comprehensive practical toolkit for stakeholder management. As such it is designed to help decision makers to attain the greatest possible outcome from the resources they invest by consciously basing their choices not merely on the impacts for their shareholders but also and more holistically for a broader range of stakeholders. Ultimately the book demonstrates how optimally harmonised stakeholder management can serve as a powerful catalyst for unlocking viable business opportunities which serve the interests of business and society. *Professions in Ethical Focus - Second Edition* Fritz Allhoff, Jonathan Milgrim, Anand

Ethics and Morality in Consumption

Deirdre Shaw, Michal Carrington, Andreas Chatzidakis, 2016-04-14 Ethical consumerism is on the rise No longer bound to the counter cultural fringes ethical concerns and practices are reaching into the mainstream of society and being adopted by everyday consumers from considering carbon miles to purchasing free range eggs to making renewable energy choices The wide reach and magnitude of ethical issues in society across individual and collective consumption has given rise to a series of important questions that are inspiring scholars from a range of disciplinary areas These differing disciplinary lenses however tend to be contained in separate streams of research literature that are developing in parallel and in relative isolation Ethics in Morality and Consumption takes an interdisciplinary perspective to provide multiple vantage points in creating a more holistic and integrated view of ethics in consumption In this sense interdisciplinary presupposes the consideration of multiple and distinct disciplines which in this book are considered in delineated chapters In addition the Editors make an editorial contribution in the final chapter of the book by combining these separate disciplinary perspectives to develop a nascent interdisciplinary perspective that integrates these perspectives and presents platforms for further research
