

etc.

A drainage pipe should slope down 2 inches for every 8 feet of run. Give the percent grade of this slope.

Solution:

just 1 ft = 12 in 8 x 12 = 96 inches

Slope: $\frac{2}{96} = 2.08\% \text{ Grade}$

In the example above, notice we first had to convert the units to inches so that we are comparing the same things, after that is simply a matter of dividing to get a decimal and multiplying to get a percent.

Example 3 – Percent Grade – Writing the percent as a slope

If you understand place value, then this is merely converting a percent to a fraction and reducing.
Convert a 12% grade to a slope as rise/run.
