M

Draw an array to represent the following word problem, then solve it. When completed, make your own multiplication word problem.

Ms. T bought 8 boxes of candy for Halloween. If each box has 6 pieces of candy, how many candies did she buy in all?

A

Choose any three multiplication facts from 2 - 10. Then list each one!

For example:

$$1 \times 0 = 0$$

$$1 \times 1 = 1$$

$$1 \times 2 = 2$$

$$1 \times 3 = 3$$

$$1 \times 4 = 4$$

$$1 \times 5 = 5$$

T

Write the multiplication sentence for the following, then solve it.

6 groups of 4

5 groups of 8

3 groups of 5

7 groups of 6

H

Write an addition word story problem. Solve it step by step. *Explain* the strategy you used, and write how you solved the problem.

$$5 \times 3 \times 2$$

Solve this multiplication sentence. Then explain, how you found your product. When completed, create your own multiplication sentence.

Use any multiplication strategy for the 4, 5, 6, 7, 8, 9 times table

For example:

Circle map:

Pick a number. Use a circle map to show that number as many different ways as you can.

For ex. →

Regrouping:

Write and draw your own subtraction word problem with double digit numbers. Solve your own problem. Double check your work.

Cases on Effective Universal Design for Learning

Implementation Across Schools Fovet, Frederic, 2024-08-05 Universal Design for Learning UDL has been hailed for over a decade as a revolutionary lens that allows schools to shift their efforts to create inclusive environments from a medical model lens to a social model approach In recent years UDL has gone beyond disability and impairment and is now considered an effective tool to create inclusive classroom provisions for Indigenous students and more widely for culturally diverse learners There is now a sizable body of literature that details the benefits of implementing UDL in the K 12 sector There is however a paucity of studies and papers examining the strategic challenges of developing UDL across schools and school boards While the initial concern has been to evidence the pedagogical benefits of introducing UDL to the classroom the challenges discussed at this current stage by classroom practitioners and school leaders are of a different nature they are strategic in nature and focus specifically on the organizational hurdles of scaling up initial efforts It is time for the UDL implementation drive the K 12 sector to go beyond curiosity and to explore sustainable growth and development Cases on Effective Universal Design for Learning Implementation Across Schools fills the gap that exists in the UDL literature at present It offers case studies and practical examples of the reflection which accompanies the systemic implementation of UDL on a wider scale across schools and schoolboards It examines the full spectrum of ecological repercussions this growth leads to Covering topics such as deficit model practices bilingual K 12 education and UDL implementation this case book is a dynamic resource for educators and administrators of K 12 education instructional designers curriculum developers pre service teachers teacher educators community leaders government officials researchers and academicians

Expectation Kimberly Kappler Hewitt, 2013-10-11 Turn your school into a place where every child achieves This book provides leaders with all that they need to promote differentiation in their schools and districts Through research and first hand experience the authors have identified effective strategies for hiring differentiation minded staff members communicating the need for differentiation to all stakeholders motivating teachers to differentiate and using differentiated teacher evaluation to effect change

Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based

strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
