Math Stations Rotation Board:

Math Work Stations Debbie Diller, 2023-10-10 If you've ever questioned how to make math stations work you'll find this photo-filled idea-packed resource invaluable. This book extends Debbie Diller's best-selling work on literacy work stations and classroom design to the field of mathematics. In *Math Work Stations* you'll find ideas to help children develop conceptual understanding and skills, use math vocabulary as they talk about their mathematical thinking, and connect big ideas to meaningful independent exploration and practice. This book details how to set up, manage, and keep math stations going throughout the year. There's even a chapter devoted solely to organizing and using math manipulatives. Each chapter includes key concepts based on NCTM and state math standards, math vocabulary resources, and literature links suggested materials to include at each station for the corresponding math content strand, ideas for modeling, troubleshooting, differentiating, and assessment, and reflection questions for professional development. Throughout the book, Debbie has included hundreds of color photos showing math work stations in action from a variety of classrooms in which she has worked. Charts, reproducible forms, and math work stations icons are included to provide everything you'll need to get started with stations in your classroom right away.

Getting Parents on Board Alisa Hindin, Mary Mueller, 2016-02-05 Learn how to work more effectively with K-5 parents to increase student achievement in math and literacy. Research shows that parent involvement in schools leads to higher test scores and more engaged and enthusiastic students, but it isn't always easy for teachers to bridge the gap between the home and the school. This insightful book provides helpful research-based strategies to foster meaningful home-school partnerships and overcome the challenges teachers often face when trying to build relationships with parents. You'll learn new ways to promote parent involvement at home and school. Share specific math and literacy strategies with parents to reinforce children's learning. Plan and organize effective parent conferences that foster true dialogue about a child's education. Communicate with parents about what you're teaching and how you're teaching it so they can actively contribute to their child's learning at home. Develop family nights and workshops to get parents involved in learning at school. Recommend games, activities, and projects that parents can use at home to help their children practice math and literacy skills. And much more. Each chapter is full of practical tools such as Common Core-aligned strategies, useful resources for parents, and sample parent letters that you can use to increase and improve your home-school communications. Bonus: Additional parent letters on a variety of topics are available on our website www.routledge.com/9781138998698 to help you keep parents connected throughout the year.

Math Exchanges Kassia Omohundro Wedekind, 2011 Traditionally, small-group math instruction has been used as a format for reaching children who struggle to understand math. Coach Kassia Omohundro Wedekind uses small-group instruction as the centerpiece of her math workshop approach, engaging all students in rigorous math exchanges. The key characteristics of these mathematical conversations are that they are 1. short-focused sessions that bring all mathematical minds together, 2. responsive to the needs of the specific group of mathematicians, and 3.

designed for meaningful guided reflection As in reading and writing workshop students in math workshop become self directed and independent while participating in a classroom community of learners Through the math exchanges students focus on number sense and the big ideas of mathematics Teachers guide the conversations with small groups of students mediating talk and thinking as students share problem solving strategies discuss how math works and move toward more effective and efficient approaches and greater mathematical understanding Although grounded in theory and research Math Exchanges Guiding Young Mathematicians in Small Group Meetings is written for practicing teachers and answers such questions as the following How can I use a math workshop approach and follow a certain textbook or set of standards How should I form small groups How often should I meet with small groups What should I focus on in small groups How can I tell if my groups are making progress What do small group math exchanges look like sound like and feel like Guided Math Workshop Laney Sammons, Donna Boucher, 2017-03-01 This must have resource helps teachers successfully plan organize implement and manage Guided Math Workshop It provides practical strategies for structure and implementation to allow time for teachers to conduct small group lessons and math conferences to target student needs The tested resources and strategies for organization and management help to promote student independence and provide opportunities for ongoing practice of previously mastered concepts and skills With sample workstations and mathematical tasks and problems for a variety of grade levels this guide is sure to provide the information that teachers need to minimize preparation time and meet the needs of all students Every Math Learner, Grades K-5 Nanci N.
