 ,1993 Condition or Process? Researching Race in Education Adrienne D. Dixon,Gloria J. Ladson-Billings,Cecilia E.
 Suarez,William T. Trent,James D. Anderson,2021-01-18 The question of why we need to think about how we research race
 demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an
 understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret

and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners
