

2.
$$-\frac{2}{3x-5} = \frac{x}{3x-1}$$
$$-6x + 2 = 3x^2 - 5x$$
$$0 = 3x^2 + x - 2$$
$$0 = (3x - 2)(x + 1)$$
$$x = \frac{2}{3} \quad \text{or} \quad x = -1$$

3.
$$2x + y = 8 \quad \text{--- (1)}$$
$$-x + 4y = 5 \quad \text{--- (2)}$$

from (1): $y = 8 - 2x$ --- (3)

(3) \rightarrow (2): $-x + 4(8 - 2x) = 5$
$$-x + 32 - 8x = 5$$
$$9x = 27$$
$$x = 3$$
$$y = 2$$

a) $\angle LMT$ or $\angle KNU$

b) $\cos \theta = \frac{40}{90}$
$$\theta = 63.61^\circ$$
$$\angle LMT = 2 \times 63.61^\circ$$
$$= 127.22^\circ$$

5. Volume in Cylindrical tank
$$= \frac{22}{7} \times \left(\frac{6}{2}\right)^2 \times 3.5$$
$$= 44 \text{ m}^3$$

Volume of water in 125 houses
$$= 125 \times 0.8 \times h$$
$$= 100h$$

$$44 = 100h$$
$$h = 0.44 \text{ m}$$

6. a) $m = \frac{1-0}{-2-0}$
$$= -\frac{1}{2}$$

on (4, 6),
$$6 = -\frac{1}{2}(4) + c$$
$$c = 8$$
$$\therefore y = -\frac{1}{2}x + 8$$

b) when $y = 0$
$$\frac{1}{2}x = 8$$
$$x = 16$$

\therefore x-intercept is 16.

people's future prospects. These examinations are external; they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as blind arbiters of student achievement, providing the proverbial level playing field which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever higher social demand for access to higher levels of formal education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems, including the modification and in some instances abandonment of external examinations. This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of external examinations beyond national borders, including a contribution by the International Baccalaureate Organisation. A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations, from question setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons; it is accessible to teachers and interested laypeople as well as to academics.

Indian Science Abstracts, 2011-10 **Developments in Educational Techniques in Britain** Great Britain. Central Office of Information. Reference Division, British Information Services, 1966 **Language Planning in Primary Schools in Asia** Richard Baldauf, Robert Kaplan, Kwonko Kamwangamalu, Pauline Bryant, 2013-09-13 In foreign language education, decisions must be taken on what languages to teach, who will teach them, in which schools, i.e. all, only urban, only rural, in which grades, the number of hours a week, and the cost involved. This book explores the answers to these questions across a number of Asian polities. It illustrates why some of the efforts undertaken are successful and why some are not, why, despite significant investments of time and resources, some students do not seem to acquire the languages being taught, and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties. It suggests some strategies various polities might attempt to achieve their stated language learning objectives. This book was originally published as a special issue of *Current Issues in*
