Francesca Polletta,2012-06-12 This excellent study of activist politics in the United States over the past century challenges the conventional wisdom about participatory democracy Times Literary Supplement Freedom Is an Endless Meeting offers vivid portraits of American experiments in participatory democracy throughout the twentieth century Drawing on meticulous research and more than one hundred interviews with activists Francesca Polletta upends the notion that participatory democracy is worthy in purpose but unworkable in practice Instead she shows that social movements have often used bottom up decision making as a powerful tool for political change Polletta traces the history of democracy from early labor struggles and pre World War II pacifism through the civil rights new left and women s liberation movements of the sixties and seventies and into today s faith based organizing and anti corporate globalization campaigns In the process she uncovers neglected sources of democratic inspiration such as Depression era labor educators and Mississippi voting registration workers as well as practical strategies of social protest Polletta also highlights the obstacles that arise when activists model their democracies after nonpolitical relationships such as friendship tutelage and religious fellowship She concludes with a call to forge new kinds of democratic relationships that balance trust with accountability respect with openness to disagreement and caring with inclusiveness For anyone concerned about the prospects for democracy in America Freedom Is an Endless Meeting will offer abundant historical theoretical and practical insights *Resources in Education* ,2001

Second International Handbook of Mathematics Education Alan Bishop,M.A. (Ken) Clements,Christine

Keitel-Kreidt,Jeremy Kilpatrick,Frederick Koon-Shing Leung,2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals General Education and the

Development of Global Citizenship in Hong Kong, Taiwan and Mainland China Jun Xing, 2013 General Education has taken center stage in the greater China area Hong Kong Taiwan and mainland China because of a number of important developments First globalization has created both opportunities and challenges for college students When they graduate and enter the real world they must have the cultural sensitivities and social skills in addition to their professional training to compete in a knowledge based global economy Equally significant for institutions of higher education pressing global problems challenge traditional disciplines and demand new forms of learning that reshapes the boundaries of knowledge In response to those rapidly changing dynamics general education has taken an increasingly important role in undergraduate education As the first English publication on the subject this anthology brings together a distinguished group of General Education scholars and teachers from Hong Kong Taiwan and mainland China

Aaron Henry of Mississippi Minion K. C. Morrison, 2015-06-05 Winner of the 2016 Lillian Smith Book Award When Aaron Henry returned home to Mississippi from World War II service in 1946 he was part of wave of black servicemen who challenged the racial status quo He became a pharmacist through the GI Bill and as a prominent citizen he organized a hometown chapter of the NAACP and relatively quickly became leader of the state chapter From that launching pad he joined and helped lead an ensemble of activists who fundamentally challenged the system of segregation and the almost total exclusion of African Americans from the political structure These efforts were most clearly evident in his leadership of the integrated Mississippi Freedom Democratic Party delegation which after an unsuccessful effort to unseat the lily white Democratic delegation at the Democratic National Convention in 1964 won recognition from the national party in 1968 The man who the New York Times described as being at the forefront of every significant boycott sit in protest march rally voter registration drive and court case eventually became a rare example of a social movement leader who successfully moved into political office Aaron Henry of Mississippi covers the life of this remarkable leader from his humble beginnings in a sharecropping family to his election to the Mississippi house of representatives in 1979 all the

while maintaining the social change ideology that prompted him to improve his native state and thereby the nation

Advisory Committee to the College Outcomes Evaluation Program,1987 *An Age of Accountability* John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Sessional Papers* Great Britain. Biomedical Computing Joseph A. November, 2012-06-01 Winner of the Computer History Museum Prize of the Special Interest Group Computers Information and Society Imagine biology and medicine today without computers What would laboratory work be like if electronic databases and statistical software did not exist Would disciplines like genomics even be feasible if we lacked the means to manage and manipulate huge volumes of digital data How would patients fare in a world absent CT scans programmable pacemakers and computerized medical records Today computers are a critical component of almost all research in biology and medicine Yet just fifty years ago the study of life was by far the least digitized field of science its living subject matter thought too complex and dynamic to be meaningfully analyzed by logic driven computers In this long overdue study historian Joseph November explores the early attempts in the 1950s and 1960s to computerize biomedical research in the United States Computers and biomedical research are now so intimately connected that it is difficult to imagine when such critical work was offline *Biomedical Computing* transports readers back to such a time and investigates how computers first appeared in the research lab and doctor's office November examines the conditions that made possible the computerization of biology including strong technological institutional and political support from the National Institutes of Health and shows not only how digital technology transformed the life sciences but also how the intersection of the two led to important developments in computer architecture and software design The history of this phenomenon has been only vaguely understood November's thoroughly researched and lively study makes clear for readers

the motives behind computerizing the study of life and how that technology profoundly affects biomedical research today

Annual Report of Research in Progress Stanford University. Institute for Communication Research, 1972 *For a Voice and the Vote* Lisa Anderson Todd, 2015-01-19 During the summer of 1964 hundreds of American college students descended on Mississippi to help the state's African American citizens register to vote. Student organizers, volunteers, and community members canvassed black neighborhoods to organize the Mississippi Freedom Democratic Party (MFDP), a group that sought to give a voice to black Mississippians and demonstrate their will to vote in the face of terror and intimidation. In *For a Voice and the Vote*, author Lisa Anderson Todd gives a fascinating insider's account of her experience volunteering in Greenville, Mississippi, during Freedom Summer when she participated in organizing the MFDP. Innovative and integrated, the party provided political education, ran candidates for office, and offered participation in local and statewide meetings for blacks who were denied the vote. For Todd, it was an exciting, dangerous, and life-changing experience. Offering the first full account of the group's five days in Atlantic City, the book draws on primary sources, oral histories, and the author's personal interviews of individuals who were supporters of the MFDP in 1964.
