Educating the Engineer for the 21st Century D. Weichert, B. Rauhut, R. Schmidt, 2006-02-17 Upspeeding technological evolution and globalisation characterise today's and future lives of engineers. It is vital for all institutions involved in engineering education to keep pace and to anticipate future needs. The herein presented collection of papers results from the Workshop on Global Engineering Education GEE 3 which took place at Aachen University of Technology 18-20 October 2000. In this meeting more than 150 specialists from 25 countries discussed the topic 'Educating the Engineer for the 21st Century'. Which role to attribute to non-technical qualifications? How to integrate ethical aspects in education? Do we have to define international standards in education? What about quality control? What is the potential of new media for knowledge transfer? How to organise lifelong learning for engineers? These are some of the questions discussed among representatives of industries, educational institutions, politicians and individuals during this meeting. According to the sessions of the workshop the book is subdivided into chapters covering the areas: Role of the Global Engineer in Meeting the Challenges of Society in the 21st Century; Internationality and Interdisciplinarity; Engineering Education in Emerging Economies; European Bachelor and Master Programmes; Developing Personal Skills to be a Global Engineer. Three chapters deal with successful practice in engineering education covering the topics: Programmes; Curricula; and Evaluation. Educational Concepts and University Industry Partnership Design Projects. Report of Royal Commission of Inquiry Into the Railway Service New Zealand. Railways Commission, 1924. Business Process Management Workshops Stefanie Rinderle-Ma, Shazia Sadiq, Frank Leymann, 2010-04-01 Business process management (BPM) constitutes one of the most exciting search areas in computer science and the BPM Conference together with its workshops provides a distinct platform for presenting the latest research and showing future directions in this area. These proceedings contain the national versions of papers accepted for the workshops held in conjunction with the 7th International Conference on Business Process Management (BPM 2009). The BPM 2009 conference and workshops took place in Ulm, Germany. We received many interesting workshop proposals, eight of which were selected. Ultimately the workshops ran on September 7, 2009, featuring highly interesting keynotes, inspiring scientific presentations and fruitful discussions. The history of seven years of BPM workshops in a row proves the continued success of the workshop program. The workshopsheldin2009includedonenewworkshoponempiricalresearch in business process management and seven well established workshops: First International Workshop on Empirical Research in Business Process Management (ER BPM 2009). The ER BPM 2009 workshop addressed the demand for empirical research methods such as experimental or case studies to BPM and invited fellow colleagues to investigate both the potential and the limitations of BPM methods and technologies in practice. The ER BPM workshop aimed at closing the gap in knowledge on process management and at discussing empirical research in the space of BPM and associated phenomena. 12th International Workshop on Reference Modeling (RefMod 2009). Although conceptual models have proven to be a useful means to support information systems

engineering in the past few years creating and especially maintaining conceptual models can be quite challenging and costly
