

SCAVENGER HUNT

1 Like whales, gorillas, and pandas all have one thing in common: they are endangered species. There are millions of species on Earth. Many of them are extinct or disappearing. In the United States, there are over 1,300 species listed as endangered or threatened. Throughout the world, there are close to 40,000 species under threat, and over 6,000 species believed to be endangered.

The disappearance of just one plant species could affect an entire food chain.

CODE WORD

2 What is causing the species to become endangered around the globe? Unfortunately, the list is long. Overhunting, deforestation, climate change, pesticides, natural disasters, pollution, just to name a few. Although there are numerous reasons for extinction, the biggest contributing factor is humans.

Many countries have made it illegal to capture, harm or hunt these animals.

CODE WORD

3 The International Union for Conservation of Nature (IUCN) has a Red List of endangered species. It may be included in the IUCN Red List of endangered species.
