Mary Anne Schofield,1989 The essays collected here explore the power and sensuality that food engenders within literature The book permits the reader to sample food as a rhetorical structure one that allows the individual writers to articulate the abstract concepts in a medium that is readily understandable The second part of *Cooking by the Book* turns to the more diverse food rhetorics of the marketplace What for example is the fast food rhetoric Why are there so many eating disorders in our society Is it possible to teach philosophy through cookery How long has vegetarianism been popular Manuscript

Recipe Books as Archaeological Objects Madeline Shanahan,2014-11-18 During the mid to late seventeenth century women

in Irish houses from elite backgrounds started to collect recipes which they recorded in domestic manuscripts. While these manuscripts were made elsewhere at an earlier date they were an almost entirely new arrival to Ireland in this period and their sudden proliferation said much about changes taking place in society at large. This book is a detailed study of such manuscripts from the perspective of historical archaeology which will argue that they are artifacts which clearly demonstrate that a profound series of changes was taking place. The written word penetrated people's daily lives and homes to a degree that it had not in previous periods and it had a profound influence on how they related to their world objects and each other. While this book will address how we can use them as sources for the study of food history and material culture it is ultimately concerned with the meanings of manuscript recipe books and specifically what they say about the individuals and society that made them. The proliferation of these manuscripts signaled a profound change not just in cuisine but also in the way people thought about and related to food as a form of material culture. Ultimately this book will argue that these manuscripts are not simply excellent records which can tell us about material culture within the early modern house but that they are a profoundly important type of artifact in their own right. Undertaking research that situates textual objects such as recipe books at the very core of historical archaeology is critical to understanding some of the most significant changes that took place in the early modern world.
