Perspectives on the Value, Teaching, Learning, and Assessment of Design in STEM Education Jeffrey Buckley,Eva Hartell,Nicolaas Blom,2023-08-25 Design is a central activity within Science Technology Engineering and Mathematics STEM education Within enacted practice design can feature within intended learning outcomes for example in learning to design and it can feature within pedagogical methodologies for example by learning through design Often holding differing disciplinary interpretations such as design as cyclical problem solving iterative design conceptual design or design with or without make understanding the educational merits of the ill defined and open nature of authentic designerly activity is paramount This Research Topic sets out to gain a more nuanced understanding of the value and role s of design within STEM educational contexts This Research Topic focuses on design within STEM educational contexts particularly in terms of teaching learning and assessment The aim is to contribute to the evidential basis which can be used to guide the incorporation of design into educational practice The topic has two central research objectives The first is to generate evidence regarding what design is in STEM education For example is the ability to design a singular or manifold construct Is the capacity to design or are factors of this ability both learnable and teachable How transferable is designerly knowledge between contexts How do different disciplinary contexts influence the interpretation of design The second is to further our understanding of how best to incorporate design within STEM education contexts For example how much emphasis should be placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education

Reinventing STEM in Early Childhood Education Eugene Geist, 2025-05-09 Teaching STEM to young children is about more than helping them learn their numbers and facts. It is an important and complex process that to be effective should honor the way children's brains are developing. This book outlines how early childhood educators can best support young children's STEM journeys as children naturally take in information about their environment, synthesize it, and grow in the process. This comprehensive text details different theories of learning, research on how young brains develop, practical information on preparing your environment and yourself for teaching STEM to children, guidance for supporting diverse populations of students, and developmental guidelines, sample standards, resources, and lesson plans. Organized chronologically, the book connects relevant STEM topics with each developmental age range and outlines common school standards for each grade. *Reinventing STEM in Early Childhood Education* is meant to be a core text for preservice teachers in math and science methods courses and is also important reading for teacher educators and professional development programs.

Conflict and Governance Susan Brown, 2005 The Authors interrogate the manner in which South Africa's changing economy is reshaping the political and the social landscape. Based on in-depth analysis of the data, suggestions are made for future policy development.

Effects of integrated learning: explicating a mathematical concept in inquiry-based science camps Louise Bindel, 2018 Although various arguments for integrated learning of mathematics and science exist, empirical evidence that integrated learning is as beneficial as anticipated is limited. Therefore, this quasi-experimental study investigates the effect of integrated learning of mathematics and science on eight student variables by comparing it to a control group. Results show that integrated learning is no miracle cure but has positive and negative effects on specific student outcomes. Whereas integrated learning affects students' view of the relation between mathematics and science positively, it affects students' scientific self-concept negatively. Thus, integrated learning should not substitute but rather complement disciplinary learning. Obwohl zahlreiche Argumente für das integrierte Lernen von Mathematik und Naturwissenschaften existieren, ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt. Im Rahmen dieser quasi-experimentellen Studie wird der Effekt integrierten Lernens auf acht Schülervariablen durch Vergleiche mit einer Kontrollgruppe untersucht. Die Ergebnisse zeigen, dass integriertes Lernen kein Allheilmittel ist, sondern positive und negative Effekte auf bestimmte Schülervariablen hat. Während integriertes Lernen die Sicht der Schülerinnen und Schüler auf die Beziehung zwischen Mathematik und Naturwissenschaften positiv beeinflusst, hat es einen negativen Effekt auf das naturwissenschaftliche Selbstkonzept. Daher sollte integriertes Lernen nicht stellvertretend, sondern ergänzend zu disziplinärem Lernen implementiert werden.

Science Education and International Cross-Cultural Reciprocal Learning George Zhou, Yuanrong Li, Jian Luo, 2023-01-25 This volume draws on findings from the Canada-China Nature Notes Reciprocal Learning Program to explore cross-cultural exchanges in science education in and outside of the classroom. Under the collaborative reciprocity perspective, cross-cultural learning needs to go beyond simple comparison in practices, values, and

results and moves to a paradigm that emphasizes a two way learning process in the context of acting together Through collaborative work between the international teams and partner schools the program described in this book shows how collaborative efforts between the two sister schools worked to raise awareness about Chinese farming culture and extend students outdoor learning experiences In this book educators from across the research team share their insights and reflect on the cross cultural collaborative process and how it impacted the learning experiences of themselves and their students

Chandrasegaran, 2017-02-28 This book discusses the importance of identifying and addressing misconceptions for the successful teaching and learning of science across all levels of science education from elementary school to high school It suggests teaching approaches based on research data to address students common misconceptions Detailed descriptions of how these instructional approaches can be incorporated into teaching and learning science are also included The science education literature extensively documents the findings of studies about students misconceptions or alternative conceptions about various science concepts Furthermore some of the studies involve systematic approaches to not only creating but also implementing instructional programs to reduce the incidence of these misconceptions among high school science students These studies however are largely unavailable to classroom practitioners partly because they are usually found in various science education journals that teachers have no time to refer to or are not readily available to them In response this book offers an essential and easily accessible guide

Characterization of Ore-Forming Systems from Geological, Geochemical and Geophysical Studies K. Gessner, T.G. Blenkinsop, P. Sorjonen-Ward, 2018-08-07 Economically viable concentrations of mineral resources are uncommon in Earth s crust Most ore deposits that were mined in the past or are currently being extracted were found at or near Earth s surface often serendipitously To meet the future demand for mineral resources exploration success hinges on identifying targets at depth Achieving this requires accurate and informed models of the Earth s crust that are consistent with all available geological geochemical and geophysical information paired with an understanding of how ore forming systems relate to Earth s evolving structure Contributions to this volume address the future resources challenge by i applying advanced microscale geochemical detection and characterization methods ii introducing more rigorous 3D Earth models iii

exploring critical behaviour and coupled processes iv evaluating the role of geodynamic and tectonic setting and v applying 3D structural models to characterize specific ore forming systems CONVASH 2019 Kundharu Saddhono ,Deny Tri Ardianto,Krichkanok Sudasna,Hasnul Jamal B Saidon,Khwanrat Chinda,Ahamad Tarmizi bin Azizan,2020-08-31 The 1st Conference of Visual Art Design and Social Humanities CONVASH 2019 is a seminar in the fields of art design and humanities held on November 2 2019 by the Faculty of Fine Arts and Design FSRD Universitas Sebelas Maret in Surakarta Indonesia Since its establishment as a Faculty 5 years ago The Faculty of Fine Arts and Designs has conducted 4 international conferences The 1st CONVASH 2019 is our international conference new brand and we have a commitment to hold CONVASH annually Conference of Visual Art Design and Social Humanities CONVASH 2019 is a tangible manifestation of FSRD s efforts to contribute to science and improve publication quality on the international level This event is expected to bring about collaboration scientific transfer and publications that can contribute to the scientific fields of arts design and humanities The conference aims to facilitate research presentations and knowledge exchange in art design technology and social humanities as well as create academic networks among students lecturers and researchers in the related fields Further this conference will bring opportunities to learn together to develop quality research in various fields expand the collaboration networks among universities and industries and become a forum to disseminate research and knowledge to a wider audience The committee received more than 130 papers from the participants and based on the results of the reviews only 96 papers were declared qualified to be presented at the seminar and subsequently published in the proceedings of CONVASH 2019 Finally the committee congratulates and expresses gratitude to the selected participants for the participation and paper publication in the proceeding of CONVASH 2019 The committee would also like to thank all parties who have supported and actively participated for the success of this event Hopefully this Proceeding can be used as a reference for technological development and learning improvement in the fields of education social arts and humanities
