Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access Maria Teresa Tatto, Justin Bruner, Fida Hussain Chang, Corvell George Cramfield, Tara Miyoko Kintz, Nai-Cheng Kuo, Sandra Kurtti Pylvainen, Andleeb Sharif, 2012-09-17 This book originated in a policy analysis class at Michigan State University taught during 2010 Using Professor Tatto's unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally We investigated the surge of globally developed standards and regulations in an effort to improve education Our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All EFA and its USA cousin No Child Left Behind NCLB We knew our work would be bounded by the time available in a one semester class and by resource constraints We did exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness We investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here *Resources in Education* ,2001-10

Curricula, Examinations, and Assessment in Secondary Education in Sub-Saharan Africa World Bank, 2008-02-15 Economic and social changes fast evolution of technology and the growing importance of Internet services and international communications all these require secondary education providers to adapt what is taught and learned in schools However in Africa the content of secondary curricula is in most cases ill adapted to 21st century challenges where young people are mobile have access to more and instant information and face health threats such as HIV AIDS In addition implementation

problems exist and the time for instruction is often much less than what is required by the prescribed secondary curriculum. In Africa there is a need to develop a secondary education curriculum adapted to the local economic and social environment but with international comparable performance indicators. This study analyzes that challenge, the quality of curricula and assessment and their development processes in secondary education in Africa against the background of existing contexts, conditions and ambitions on the one hand and current pedagogical thinking on the other. This World Bank Working Paper was prepared as part of the Secondary Education and Training in Africa SEIA initiative which aims to assist countries to develop sustainable strategies for expansion and quality improvements in secondary education and training. **Mobile**

Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy Ng, Wan, 2010-08-31. Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy provides readers with a rich collection of research-informed ideas for integrating mobile technologies into learning and teaching. Each chapter looks critically at the issues, related benefits and limitations of learning ubiquitously within the context of the research reported. New and emerging technologies present challenges for education, causing educators to have to rethink pedagogy, boundaries and curriculum if they continue to embrace mobile technologies in their teaching. **Contemporary Research and Perspectives on Early**

Childhood Mathematics Education Iliada Elia, Joanne Mulligan, Ann Anderson, Anna Baccaglini-Frank, Christiane Benz, 2018-02-21. This book brings together a collection of research-based papers on current issues in early childhood mathematics education that were presented in the Topic Study Group 1 TSG 1 at the 13th International Congress on Mathematical Education ICME 13 held at the University of Hamburg in 2016. It will help readers understand a range of key issues that early childhood mathematics educators encounter today. Research on early childhood mathematics education has grown in recent years due in part to the well-documented positive relation between children's early mathematical knowledge and their later mathematics learning and to the considerable emphasis many countries are now placing on preschool education. The book addresses a number of central questions including: What is mathematical structural development and how can we promote it in early childhood? How can multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young children's mathematical development? How can children's informal mathematics-related experiences affect instruction and children's learning in different mathematics content areas? What is the role of tools including technology and picture books in supporting early mathematics learning? What are the challenges in early childhood mathematics education for teachers' education and professional development? Performance Incentives Matthew G. Springer, 2009-12-01. The concept of pay for performance for public school teachers is growing in popularity and use and it has resurged to once again occupy a central role in education policy. Performance Incentives: Their Growing Impact on American K-12 Education offers the most up-to-date and complete

analysis of this promising yet still controversial policy innovation Performance Incentives brings together an interdisciplinary team of experts providing an unprecedented discussion and analysis of the pay for performance debate by Identifying the potential strengths and weaknesses of tying pay to student outcomes Comparing different strategies for measuring teacher accomplishments Addressing key conceptual and implementation issues Describing what teachers themselves think of merit pay Examining recent examples in Arkansas Florida North Carolina and Texas Studying the overall impact on student achievement
