Johann C. Dauer,2021-11-02 This book investigates Unmanned Aircraft Systems UAS with a payload capacity of one metric
ton for transportation The authors provide a large variety of perspectives from economics to technical realization With the
focus on such heavy lift cargo UAS the authors consider recently established methods for approval and certification which
they expect to be disruptive for unmanned aviation In particular the Specific Operations Risk Assessment SORA and its
impact on the presented technological solutions and operational concepts are studied Starting with the assumption of an
operation over sparsely populated areas and below common air traffic diverse measures to further reduce operational risks
are proposed Operational concepts derived from logistics use cases set the context for an in depth analysis including aircraft
and system design safe autonomy as well as airspace integration and datalinks Results from simulations and technology
demonstrations are presented as a proof of concept for solutions proposed in this book *Sport Aviation and the*
