Encyclopedia of Crime and Punishment David Levinson,2002 Authoritative and comprehensive this multivolume set includes hundreds of articles in the field of criminal justice Impressive arrays of authors have contributed to this resource addressing such diverse topics as racial profiling money laundering torture prisoner literature the KGB and Sing Sing Written in an accessible manner and attractively presented the background discussions definitions and explanations of important issues and future trends are absorbing Interesting sidebars and facts reference lists relevant court cases tables and black and white photographs supplement the entries Appendixes cover careers in criminal justice Web resources and professional organizations A lengthy bibliography lists relevant works The Best of the Best Reference Sources American Libraries May 2003 **The Osteology of Infants and Children** Brenda J. Baker,Tosha L. Dupras,Matthew W. Tocheri,2005-07-27 Most archaeologists and bioarchaeologists receive little or no training in the recognition of skeletal remains of fetuses infants and children Yet many research sites may contain such materials Without a framework for identifying the bones or the excavation techniques suited to their recovery archaeologists may often overlook subadult skeletal remains or even confuse them with animal bones The Osteology of Infants and Children fills the need for a field and lab manual on this important topic and provides a supplemental textbook for human osteology courses Focusing on juvenile skeletons their recovery and identification and siding in both field and lab settings the volume provides basic descriptions and careful illustrations of each skeletal element at varying stages of development along with sections on differentiation from other bones and siding tips The book offers detailed treatment of the skull and teeth including the cranial vault and facial bones and examines the infracranial skeleton vertebrae pelvis chest shoulders arms hands legs and feet A quick reference guide explains age estimation and identification templates The illustrations are enhanced by photographs from two recent archaeology projects in Egypt at Abydos and Dakhleh Oasis The extensive collection of fetal and child remains from these sites provides new reference material unavailable in previous publications making this manual an unparalleled resource in the field of physical anthropology **Human Osteology** Tim D. White,Michael T. Black,Pieter A. Folkens,2011-01-21 A

classic in its field Human Osteology has been used by students and professionals through nearly two decades Now revised and updated for a third edition the book continues to build on its foundation of detailed photographs and practical real world application of science New information expanded coverage of existing chapters and additional supportive photographs keep this book current and valuable for both classroom and field work Osteologists archaeologists anatomists forensic scientists and paleontologists will all find practical information on accurately identifying recovering and analyzing and reporting on human skeletal remains and on making correct deductions from those remains From the world renowned and bestselling team of osteologist Tim D White Michael T Black and photographer Pieter A Folkens Includes hundreds of exceptional photographs in exquisite detail showing the maximum amount of anatomical information Features updated and expanded coverage including forensic damage to bone and updated case study examples Presents life sized images of skeletal parts for ease of study and reference

Comparative Osteology Bradley Adams, Pam Crabtree, 2011-08-12 In the forensic context it is quite common for nonhuman bones to be confused with human remains and end up in the medical examiner or coroner system It is also quite common for skeletal remains both human and nonhuman to be discovered in archaeological contexts While the difference between human and nonhuman bones is often very striking it can also be quite subtle Fragmentation only compounds the problem The ability to differentiate between human and nonhuman bones is dependent on the training of the analyst and the available reference and or comparative material Comparative Osteology is a photographic atlas of common North American animal bones designed for use as a laboratory and field guide by the forensic scientist or archaeologist The intent of the guide is not to be inclusive of all animals but rather to present some of the most common species which also have the highest likelihood of being potentially confused with human remains An affordably priced compact laboratory field manual comparing human and nonhuman bones Contains almost 600 high quality black and white images and diagrams including inch and centimeter scales with each photograph Written by the foremost forensic scientists with decades of experience in the laboratory and as expert witnesses An additional Companion Web site hosts images from the volume the reader can magnify and zoom into to see specific landmarks and features on bones <http://booksite.academicpress.com/9780123884374>
