

State of Our Schools Speech by Superintendent Ann Clark

Thank you, Steven. Good morning, everyone. It's a pleasure to welcome all of you to our annual State of Our Schools event. Thank you for making time to join us.

As Steven told you, we first met when he was in middle school at Alexander Graham and I was the principal there. It has been my privilege to follow his journey from student to successful adult. We want every student in CMS to make that journey successfully. Ensuring that every child completes the journey is the mission of CMS. All of us in this room today care about our children and their education.

Educating a child is a process that begins at home and continues all the way through school and into the workplace and the wider world. Education cannot be accomplished or measured in a single day, a single test or a single year. It's a lifelong journey that builds on success in the early grades to create a foundation for learning later on. It's a continuum of learning and support that begins when a child enters school and continues all the way through high school and beyond. So many people are needed along the way. Parents, teachers, school staff, administrators all have a role to play. So do many others – volunteers, working professionals, citizens, elected officials.

We are fortunate to have the support of our district employees and the wider community. I've asked seven people who are involved with CMS to tell their stories during today's program and they are here on stage. Let me introduce them now and then you'll hear from them as we go along. I will introduce them starting from your left. Psalms Olivia Phifer White is a senior at Harding University High School. Next to her is Katie B. Morris, who chairs the Belk Foundation. Mark Rohlinger is the plant technical director for Bosch Rexroth in Charlotte. Lecia Shockley is the 2014 CMS Teacher of the Year and teaches second grade at Selwyn Elementary. Michael DeVaul is senior vice president of organizational advancement for the YMCA and the proud parent of two CMS graduates. Carmen Concepcion is the principal at Oaklawn Language Academy. Justin Ashley is a social studies teacher at Community House Middle School. We are very glad to have all of you with us today – thank you for taking part in our State of Our Schools event.

Individual Principals Presentation Speeches:

Pitch Determination of Speech Signals W. Hess, 2012-12-06 Pitch is a fundamental frequency F_0 and fundamental period T_0 occupies a key position in the acoustic speech signal. The prosodic information of an utterance is predominantly determined by this parameter. The ear is more sensitive to changes of fundamental frequency than to changes of other speech signal parameters by an order of magnitude. The quality of vocoded speech is essentially influenced by the quality and faultlessness of the pitch measurement. Hence the importance of this parameter necessitates using good and reliable measurement methods. At first glance the task looks simple: one just has to detect the fundamental frequency or period of a quasi-periodic signal. For a number of reasons, however, the task of pitch determination has to be counted among the most difficult problems in speech analysis. 1. In principle, speech is a nonstationary process; the momentary position of the vocal tract may change abruptly at any time. This leads to drastic variations in the temporal structure of the signal even between subsequent pitch periods, and assuming a quasi-periodic signal is often far from realistic. 2. Due to the flexibility of the human vocal tract and the wide variety of voices, there exist a multitude of possible temporal structures. Narrow band formants at low harmonics, especially at the second or third harmonic, are an additional source of difficulty. 3. For an arbitrary speech signal uttered by an unknown speaker, the fundamental frequency can vary over a range of almost four octaves (50 to 800 Hz).
