CEO COMMENTS

"During the second half of 2009, Networks' sales were impacted by reduced operator spending in a number of markets. Group sales for the full year were less affected and the operating margin increased slightly," says Håkan Vestberg, President and CEO of Ericsson (NASDAQ:ERIC). "We maintained market shares well in all segments, cash flow was good and our financial position is strong. The services business performed well, and our joint ventures remain on track to return to profit."

The shift from voice telephony to mobile broadband investments continues. Users and traffic are increasing rapidly and will eventually connect billions of people to the internet. As previously stated, with this shift follows the anticipated decline in GSM sales, accelerated by the current economic climate, which is not yet offset by the growth in mobile broadband and investments in next-generation IP networks.

Current operator investment behavior varies between regions and countries. During 2009, operators in a number of developing markets, especially Central Europe, Middle East and Africa, became increasingly cautious with investments. Meanwhile, other markets including China, India and the US continued to show good development with major network buildouts. There is also a continued strong demand for services targeting the operational efficiency of operators, such as managed services and consulting.
