The new standard reference on mathematical functions replacing the classic but outdated handbook from Abramowitz and Stegun Includes PDF version      *Handbook of Global Optimization* R. Horst, Panos M. Pardalos, 2013-12-11 Global optimization is concerned with the computation and characterization of global optima of nonlinear functions During the past three decades the field of global optimization has been growing at a rapid pace and the number of publications on all aspects of global optimization has been increasing steadily Many applications as well as new theoretical algorithmic and computational contributions have resulted The Handbook of Global Optimization is the first comprehensive book to cover recent developments in global optimization Each contribution in the Handbook is essentially expository in nature but scholarly in its treatment The chapters cover optimality conditions complexity results concave minimization DC programming general quadratic programming nonlinear complementarity minimax problems multiplicative programming Lipschitz optimization fractional programming network problems trajectory methods homotopy methods interval methods and stochastic approaches The Handbook of Global Optimization is addressed to researchers in mathematical programming as well as all scientists who use optimization methods to model and solve problems      *Guide to Information Centers for Workers in the Social Services* , 1971      Big Data Nasir Raheem, 2019-02-21 Big Data A Tutorial Based Approach explores the tools and techniques used to bring about the marriage of structured and unstructured data It focuses on Hadoop Distributed Storage and MapReduce Processing by implementing i Tools and Techniques of Hadoop Eco System ii Hadoop Distributed File System Infrastructure and iii efficient MapReduce processing The book includes Use Cases and Tutorials to provide an integrated approach that answers the What How and Why of Big Data Features Identifies the primary drivers of Big Data Walks readers through the theory methods and technology of Big Data Explains how to handle the 4 V s of Big Data in order to extract value for better business decision making Shows how and why data connectors are critical and necessary for Agile text analytics Includes in depth tutorials to perform necessary set ups installation configuration and execution of important tasks Explains the command line as well as GUI interface to a powerful data exchange tool between Hadoop and legacy r dbms databases      *Guide to the High Technology Industries* Ballingerry Publishing, 1983      **Graded Logic** Jozo Dujmović, 2025-09-19 Observable human commonsense reasoning can be modeled with graded propositional logic Our approach is distinctive in that all mathematical models are directly linked to specific observable and explainable mental activities Decision makers evaluate alternatives through perceived gradations of truth importance suitability simultaneity and substitutability Each graded variable has a semantic identity reflecting its role and meaning tied to the goals and interests of a specific decision maker Graded logic was introduced 50 years ago and this book presents its current status based on a half

century of improvements and applications The book includes examples of decision problems solved using graded logic models Our aim is to provide readers with a solid theoretical foundation in graded propositional calculus enabling them to confidently apply the LSP method on complex evaluation and decision problems Additionally the book suggests numerous directions for future research and applications
