

5 pillars of information assurance

Availability	Integrity	Authentication	Confidentiality	Nonrepudiation
Ensures information is ready for use and at the required performance level.	Guarantees data, associated systems only accessible or modifiable by authorized users.	Ensures users are who they say they are (i.e., user names/passwords, biometrics, digital certificates and security tokens).	Limits access or places restrictions on data like personally identifiable information/ classified corporate data.	Ensures individuals cannot deny an action because a system provides proof of the action.
