Information Infrastructure S Boundaries Ecologies Multiplicity:

Information Infrastructure(s) Alessandro Mongili, Giuseppina Pellegrino, 2014-11-10 This book marks an important contribution to the fascinating debate on the role that information infrastructures and boundary objects play in contemporary life bringing to the fore the concern of how cooperation across different groups is enabled but also constrained by the material and immaterial objects connecting them As such the book itself is situated at the crossroads of various paths and genealogies all focusing on the problem of the intersection between different levels of scale throughout devices networks and society Information infrastructures allow facilitate mediate saturate and influence people s material and immaterial surroundings They are often shaped and intertwined with networks of relations and distributed agency sometimes enabling the existence of such networks and being in turn produced by them Such infrastructures are not static and immobile in time and space rather they require maintenance and repair which becomes an important aspect of their use They also define and cross more or less visible boundaries shape and act as ecologies and constitute themselves as multiple entities The various chapters of this edited book question the role of information infrastructures in various settings from both a theoretical and an empirical viewpoint reflecting the contributors interests in science and technology studies organization studies and information science as well as mobilities and media studies

Negotiating Digital Heritage Infrastructures Quoc-Tan Tran, 2025-09-18 Negotiating Digital Heritage Infrastructures examines the infrastructural qualities of museum work that influence the ability of cultural institutions to support participatory and socially inclusive missions Drawing on data gathered in Scotland Sweden and Germany and taking an infrastructure studies approach the book focuses on the socio technical negotiations underpinning the everyday practices of museum staff The book examines the work that is done behind the scenes including the everyday tasks of collecting archiving displaying museum objects and retrieving information Tran argues that while the technical components of infrastructure are necessary for memory making and knowledge production it is the social part of museum infrastructure that enables more open and decentralised modes of memory making The book shows how these negotiations affect the ability of museum infrastructures to accommodate and support growth and development expanding access and establishing modes of connection to external partners and services It illuminates the less visible practices of museums which nevertheless directly affect their more public outward facing activities Negotiating Digital Heritage Infrastructures will be of interest to academics and students who are engaged in the study of museums and heritage It will be particularly useful to those with an interest in public participation social inclusion heritage management the digitisation of collections data aggregation and human centred design approaches

Reassembling Scholarly Communications Martin Paul Eve, Jonathan Gray, 2020-10-20 A range of perspectives on the complex political philosophical and pragmatic implications of opening research and scholarship through digital technologies The Open Access Movement proposes to remove price and permission barriers for accessing peer reviewed research work to use the power of the internet

to duplicate material at an infinitesimal cost per copy In this volume contributors show that open access does not exist in a technological vacuum there are complex political philosophical and pragmatic implications for opening research through digital technologies The contributors examine open access across spans of colonial legacies knowledge frameworks publics and politics archives and digital preservation infrastructures and platforms and global communities

Data Paradoxes Klaus Hoeyer, 2023-04-18 Why healthcare cannot and should not become data driven despite the many promises of intensified data sourcing In contemporary healthcare everybody seems to want more data of higher quality on more people and to use this data for a wider range of purposes In theory such pervasive data collection should lead to a healthcare system in which data can quickly efficiently and unambiguously be interpreted and provide better care for patients more efficient administration enhanced options for research and accelerated economic growth In practice however data are difficult to interpret and the many purposes often undermine one another In this book anthropologist and STS scholar Klaus Hoeyer offers an in depth look at the paradoxes surrounding healthcare data Focusing on Denmark a world leader in healthcare data infrastructures Hoeyer shares the perspectives of different stakeholders from epidemiologists to hospital managers from patients to physicians analyzing the social dynamics set in motion by data intensification and calling special attention to that which cannot be easily coded in a database HHe illustrates how data can be at once helpful overwhelming and sometimes disastrous through concrete examples The COVID 19 pandemic serves as a special closing case study that shows how these data paradoxes carry weighty political implications By revealing the diverse and sometimes contradictory practices spawned by intensified data sourcing **Data Paradoxes** raises vital questions about how we might better use healthcare data
