the use of descriptive and multivariate statistics major competency factors were identified These factors were used in structural equation modelling to build various validated predictive models This book contributes to the current body of knowledge by uncovering the competencies that IT project managers consider themselves competent in The structural equation models indicated predictors of perceived competence by IT project managers and where these perceived competencies differ from literature Twelve managerial implications are highlighted in the final chapter that seek to draw the myriad threads together into a coherent summary It is apparent that IT project managers do not consider the PMCDF important in its entirety but instead choose to focus on certain competencies Project Management Edoardo
