Cheng, Tadashi Ohta, 1995 In an information society heavily dependent on communications and distributed systems feature interactions are likely to become an even more important problem than they are today A particularly interesting issue given the current work on agents is whether feature interactions will be more likely in systems with many autonomous agents performing tasks The current demand for better and more convenient communications requires development of a variety of new services as quickly as possible As the number of services becomes larger however feature interactions create incompatibilities between the various functions needed to implement them In developing telecommunication systems we now spend huge numbers of person hours on software modifications and testing whenever a new function is added Much of this time is spent on detecting and eliminating problems arising from feature interaction In the future as ever more services are offered feature interactions will become a major bottleneck in the development of software for telecommunications systems This book presents opinions on the technical problems involved in feature interactions and definitions of features and feature interactions *Conceptual Structures: Fulfilling Peirce's Dream* Dickson Lukose, 1997-07-16 This book constitutes the refereed proceedings of the Fifth International Conference on Conceptual Structures ICCS 97 held in Seattle Washington USA in August 1997 The 39 full papers presented were carefully selected and revised for inclusion in the volume Also included are 9 abstracts of conceptual graphs tools The papers are organized in sections on knowledge representation knowledge modeling formal concept analysis formal reasoning applications of conceptual graphs and conceptual graphs tools This book competently documents the progress achieved in the area since the predecessor conference ICCS 96 the proceedings of which have been published as LNAI 1115 *The Informix Guide to SQL*, 1991 **Planning and decision-making in human-wildlife conflict and coexistence** Silvio Marchini, Alexandra Zimmermann, Katia Maria P.
