From What Is to What If Rob Hopkins, 2019-10-15 Big ideas that just might save the world The Guardian The founder of the international Transition Towns movement asks why true creative positive thinking is in decline asserts that it s more important now than ever and suggests ways our communities can revive and reclaim it In these times of deep division and deeper despair if there is a consensus about anything in the world it is that the future is going to be awful There is an

epidemic of loneliness an epidemic of anxiety a mental health crisis of vast proportions especially among young people There is a rise in extremist movements and governments Catastrophic climate change Biodiversity loss Food insecurity The fracturing of ecosystems and communities beyond it seems repair The future to say nothing of the present looks grim But as Transition movement cofounder Rob Hopkins tells us there is plenty of evidence that things can change and cultures can change rapidly dramatically and unexpectedly for the better He has seen it happen around the world and in his own town of Totnes England where the community is becoming its own housing developer energy company enterprise incubator and local food network with cascading benefits to the community that extend far beyond the projects themselves We do have the capability to effect dramatic change Hopkins argues but we're failing because we've largely allowed our most critical tool to languish human imagination As defined by social reformer John Dewey imagination is the ability to look at things as if they could be otherwise The ability that is to ask What if And if there was ever a time when we needed that ability it is now Imagination is central to empathy to creating better lives to envisioning and then enacting a positive future Yet imagination is also demonstrably in decline at precisely the moment when we need it most In this passionate exploration Hopkins asks why imagination is in decline and what we must do to revive and reclaim it Once we do there is no end to what we might accomplish From What Is to What If is a call to action to reclaim and unleash our collective imagination told through the stories of individuals and communities around the world who are doing it now as we speak and witnessing often rapid and dramatic change for the better

Understanding Assessment David Lambert, David Lines, 2013-04-15 This is the first title in this new series which is aimed principally at secondary PGCE and BAEd students and school and HEI based tutors Each book provides a digest of the central issues around a particular topic or issues grounded in or supported by examples of good practice with suggestions for further reading study and investigation The books are not intended as how to books but rather as books which will help students and teachers to explore and understand critical theoretical issues in ways that are challenging that invite critical reappraisals of taken for granted practices and perceptions and that provide appropriate links between theory and practice Issues related to equal opportunities and special needs are included in each separate volume There are boxes of questions think abouts further reading and bulleted summary lists for the reader This book is written specifically for teachers in training which will clarify the big picture of monitoring and assessment and makes the crucial distinctions in this large and still taken for granted field The authors have written widely on assessment matters and have also worked in various capacities for the QCA and its former manifestations They are also engaged in initial teacher education and so know the level and market extremely well

Comparative Perspectives on Inquiry-Based Science Education Bevins, Stuart, Lehane, Louise, Booth, Josephine, 2019-03-15 The core practice of professional scientists is inquiry often referred to as research If educators are to prepare students for a role in the professional scientific and technological community exposing them to inquiry based learning is essential Despite this inquiry based teaching and learning IBTL

remains relatively rare possibly due to barriers that teachers face in deploying it or to a lack of belief in the teaching community that inquiry based learning is effective Comparative Perspectives on Inquiry Based Science Education examines stories and experiences from members of an international science education project that delivered learning resources based around guided inquiry for students to a wide range of schools in 12 different countries in order to identify key themes that can provide useful insights for student learning teacher support and policy formulation at the continental level The book provides case studies across these 12 different settings that enable readers to compare and contrast both practice and policy issues with their own contexts while accessing a cutting edge model of professional development It is designed for educators instructional designers administrators principals researchers policymakers practitioners and students seeking current and relevant research on international education and education strategies for science courses *The Newly Qualified Secondary Teacher's Handbook* Kevan Bleach, 2013-12-16 Written to coincide with the introduction of Induction Standards for new entrants to the teaching profession this text aims to help to smooth the transition from theory and supervised teaching to independent reflexive practice It provides a combination of explanation challenge practical activities and authentic case studies The author acknowledges the importance of professional development during the induction year and advocates the gradual implementation and reinforcement of effective strategies for good teaching He also urges readers to develop the creative intuitive and natural born abilities that help to fashion their own individual teaching styles Though informed by the Induction Standards the aim of the book is to help teachers set ambitious personal and professional expectations through which they will realize their full potential **Teaching History** Hilary Bourdillon, 2013-10-31 Against a background of controversy surrounding the teaching of history this reader gathers the current thoughts of the leading practitioners The development of school history up to the national curriculum and beyond is traced and the main issues concerning history teachers today are examined These issues include access to history the definition of British history in a multicultural society gender and the place of history with the humanities Progression and attainment are discussed as is the development of pupils historical understanding and practical approaches to teaching history to 11 18 level pupils are explored *A Very Short, Fairly Interesting and Reasonably Cheap Book About Human Resource Management* Irena Grugulis, 2016-11-10 Engaging and entertaining in equal measure Human Resource Management is a book about work the people who do it and the way they are managed and mismanaged Raising issues that are often neglected in typical HRM texts such as work intensification and unemployment it explores the realities of work workers and the communities that are affected by HRM policy and practice Grugulis draws on current research to provide a critical and reflective overview of the key debates in HRM today Conceived by Chris Grey as an antidote to conventional textbooks each book in the Very Short Fairly Interesting and Reasonably Cheap series takes a core area of the curriculum and turns it on its head by providing a critical and sophisticated overview of the key issues and debates in an informal conversational and often humorous way Suitable for students of HRM

professionals working in organizations and anyone with an interest in the nature of human resources **Criminology on Trump** Gregg Barak, 2022-05-16 Criminology on Trump is a criminological investigation of the world's most successful outlaw Donald J. Trump. Over the course of five decades, Donald Trump has been accused of sexual assault, tax evasion, money laundering, non-payment of employees, and the defrauding of tenants, customers, contractors, investors, bankers, and charities. Yet he has continued to amass wealth and power. In this book, criminologist and social historian Gregg Barak asks why and how. This book examines how the United States precariously maintains stability through conflict in which groups with competing interests and opposing visions struggle for power, negotiate rule-breaking, and establish criminal justice. While primarily focused on Trump's developing character over three quarters of a century, it is also an inquiry into the changing cultural character and social structure of American society. It explores the ways in which both crime and crime control are socially constructed in relation to a changing political economy. An accessible and compelling read, this book is essential for all those who seek a criminological understanding of Donald Trump's rise to power.
