Nordic Food Transitions Jesper Manniche, Bjornar Saether, 2018-12-07 The ambition of the book is to investigate a possible transition in the markets for food in the Nordic countries Six chapters from various disciplinary traditions study change and innovation within the food sectors in Denmark Sweden and Norway while an introductory chapter discusses the findings of these analyses Specialty food has established a strong position within product categories such as craft beer in Denmark and organic food in Sweden but has failed to do so in others The emergence of markets for specialty foods have been promoted by top down policy initiatives and bottom up entrepreneurial efforts Far from providing the only relevant platform for food transition and innovation the New Nordic Food manifesto has helped creating a territorialized action space for networks of food producers and distributors promoting diversity in local food and rural development Some of the specialty food networks have succeeded in re scaling their

operations from a local to a national market Today even large retailers and food processing companies have to pay notice to the ongoing changes among consumers There is however a paradoxical constraint in a transition towards specialty food A large scale transition would imply that producers and consumers abandon precisely what constitute them their exclusiveness The chapters were originally published in a special issue of European Planning Studies

the attention of parts of the U S space science community which sees this platform despite its inherent constraints as a way to affordably access space and perform unique measurements of scientific value The first science results from such CubeSats have only recently become available however questions remain regarding the scientific potential and technological promise of CubeSats in the future Achieving Science with CubeSats reviews the current state of the scientific potential and technological promise of CubeSats This report focuses on the platform s promise to obtain high priority science data as defined in recent decadal surveys in astronomy and astrophysics Earth science and applications from space planetary science and solar and space physics heliophysics the science priorities identified in the 2014 NASA Science Plan and the potential for CubeSats to advance biology and microgravity research It provides a list of sample science goals for CubeSats many of which address targeted science often in coordination with other spacecraft or use sacrificial or high risk orbits that lead to the demise of the satellite after critical data have been collected Other goals relate to the use of CubeSats as constellations or swarms deploying tens to hundreds of CubeSats that function as one distributed array of measurements

Japanese Political Economy Revisited David Chiavacci, Sébastien Lechevalier, 2020-11-25 During the last 30 years the Japanese political economy system has experienced significant changes that are usually not well understood or analysed because of their complexity and contradictions This book

provides new analyses and insights on the process of evolving Japanese political economy including Japan's current economic policy known as Abenomics. The first three chapters look at evolutions at the corporate level characterised in recent years by increasing firm heterogeneity. The authors apply theoretically driven analyses to the complex subject of corporate governance, human resource management and corporate reporting by discussing new developments in context of their economic opportunities as well as of their institutional contradictions with continuities in Japanese business practices. The second group of chapters deals with institutional changes and evolving economic reforms on the macro level of political economy. The two chapters focus on the financial system regulation and economic growth policies as two central elements of Japan's political economy and key drivers in the evolution of its economy. Their analysis allows us to better understand the interplay between reforms and change in consumption credit and to reinterpret Abenomics as a manifestation of ongoing contradictions within the Japanese political economy. The chapters were originally published in a special issue in Japan Forum.

The Routledge Handbook on Sports Law and Governance Annette Greenhow, John Wolohan, 2025-03-25. The Routledge Handbook on Sports Law and Governance provides a definitive guide to the regulation of international and national sport through the lens of both regulatory governance and legal frameworks. Over the past several decades, law regulation and governance associated with international and national sport has grown exponentially aligned with professional and elite level sport development. The organisation and sophistication of international and national sporting competitions create an environment where pressures such as the sports ethic and strong incentives to win give rise to both novel problems and reoccurring themes. Exploring a wide range of perspectives across disciplines and transcending jurisdictional boundaries, the handbook analyses complex international and national sports challenges. Taking a nuanced approach to traditional themes, it recognises the context and sport as a regulatory domain when applying law and legal frameworks. This book is an essential resource for students and academics exploring issues in international and national sports law, sports regulation and sports governance.
