Armed Conflict, Women and Climate Change Jody M. Prescott, 2018-11-21 The gender differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community as demonstrated by UN Security Council Resolution UNSCR 1325 on Women Peace and Security and subsequent resolutions Similarly the development community has identified gender differentiated impacts upon women and girls as a result of the effects of climate change Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict Little research has been conducted on the possible compounding effects that armed conflict

and climate change might have on at risk population groups such as women and girls Armed Conflict Women and Climate Change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian centric operations in situations of humanitarian relief peacekeeping and even armed conflict This book examines strategy and military doctrine from NATO the UK US and Australia and explores key issues such as displacement food and energy insecurity and male out migration as well as current efforts to incorporate gender considerations in military activities and operations This innovative book will be of great interest to students and scholars of international relations international development international security sustainability gender studies and law

Naval Register ,1913 Federal Register ,2013-03 *Social Science Perspectives on Climate Change* David Canter,2017-10-02 Although it is generally accepted that the climate is changing for the worse and that human activities are a major contributing factor in that change there is still only marginal response to the challenge posed by climate change The reasons behind this limited response are becoming clearer through the recognition that climate change is not just a set of physical science facts but it is also part of a series of complex social processes Consequently this book is important in providing social science perspectives on a range of attempts to adjust human activity to reduce its environmental impact These attempts vary from the changing of the dress code in Japanese offices to the creation of zero carbon gated communities in Bangalore India Taken together the contributions to this book provide timely insights into the complexities of saving the planet through human endeavour This book was originally published as a special issue of Contemporary Social Science

Visual Politics and North Korea David Shim, 2013-10-15 In the realm of international relations there are seemingly few states like North Korea Whether it is the country's human rights situation its precarious everyday life or its so called foreign policy of coercion and nuclear brinkmanship no matter what this pariah nation says and does it affects the state and stability of regional and global politics But what do we know about North Korea and how do we come to know it This book argues that visual imagery plays a decisive role in this operation By discussing two exemplary areas everyday photography and satellite imagery the book takes into account the role of images in the way that particular issues related to North Korea are understood in contemporary geopolitics Images work They do something by evoking a particular perspective of what is shown in them allowing only specific ways of seeing and knowing In this sense images are deeply political Individual methodological usages in the book can provide a procedural basis from which to start or rethink further studies on visibility both in IR and beyond It also opens an innovative path for future studies on East Asia making the book attractive to a range of specialists and thus holding an appeal beyond the boundaries of a single discipline
