

In a manufacturing process 25% of articles are thought to be defective. Articles are produced in batches of 20

- (a) A batch is selected at random. Using a 5% significance level, find the critical region for a two tailed test that the probability of an article chosen at random being defective is 0.25

You should state the probability in each tail which should be as close as possible to 0.025

Charros Laura R. Barraclough, 2019-06-04 In the American imagination no figure is more central to national identity and the nation's origin story than the cowboy Yet the Americans and Europeans who settled the U S West learned virtually everything they knew about ranching from the indigenous and Mexican horsemen who already inhabited the region The charro a skilled elite and landowning horseman was an especially powerful symbol of Mexican masculinity and nationalism After the 1930s Mexican Americans in cities across the U S West embraced the figure as a way to challenge their segregation exploitation and marginalization from core narratives of American identity In this definitive history Laura R Barraclough shows how Mexican Americans have used the charro in the service of civil rights cultural citizenship and place making Focusing on a range of U S cities Charros traces the evolution of the original cowboy through mixed triumphs and hostile backlashes revealing him to be a crucial agent in the production of U S Mexican and border cultures as well as a guiding force for Mexican American identity and social movements
