

When $x \geq 0$, $|x| = x$, so it is not true that $|x| > x$. However, when $x < 0$, $|x| = -x$. This means x is negative and $|x|$ is positive, and since any positive number is greater than any negative number, $|x| > x$ when $x < 0$.

Question: 6

Consider the following graphic showing demographics of a high school with 1219 total students:

Which of these is the least quantity?

- The average number of Black students in the 9th and 10th grades
- The number of Asian female students at the school
- The difference in the number of male and female students at the school
- The difference in the number of 10th and 12th grade students at the school

Answer: B

Explanation:

The difference in the number of male and female students at the school is $630 - 589 = 41$, and the difference in the number of 9th and 12th grade students at the school is $327 - 255 = 72$. There are approximately 38 Asian females at the school (0.06×630). The average number of black students is more than 90 (30% of 300) because there are more than 90 in the 10th grade and the class is smaller than the 9th grade group.

Question: 7

$$(\sqrt{2} + \sqrt{3}) \times (2 + \sqrt{6}) = ?$$

- $2\sqrt{6} + 4$
- $3\sqrt{2} + 2\sqrt{3}$
- $5\sqrt{2} + 4\sqrt{3}$
- $2\sqrt{5} + \sqrt{30}$

Answer: C

College Prep Math Workbook M. J. Sanders, 2015-03-25 Contents A workbook containing 30 days of basic review exercises in preparation for college mathematics Each daily section contains a short exercise set covering basic skills necessary to perform well in an introductory college math course Focus has been placed on those skills which are difficult to retain without continued practice The exercise collection in Part I is designed for skill enhancement in mathematics skills such as factoring solving equations understanding and using function notation working with exponents and radicals etc Rather than being all inclusive the work strives to provide continued practice in the most fundamental skills necessary for

successful college work Daily work notes are provided in Part II that speak directly to the pertinent aspects of each day's exercise set Brief and to the point with examples when needed for clarity these work notes add an extra dimension to help students stay on track and progress through the exercise sets Part III contains a complete answer set College students and their parents frequently discover that lack of college mathematical readiness requires an extra semester or even a year of college in order to earn a desired degree A trend at colleges to attempt to remedy this situation is to offer on campus summer bridge or math boot camp programs for entering students to alleviate this shortcoming While effective these programs are time consuming and prohibitively costly for many students In a similarly designed approach this workbook provides a cost effective self study method to help students to stay current in mathematics and be prepared to hit the ground running when entering college It is a worthy approach to help you or your child realize a successful start to a college career
