Conceptual Maths Peter Mattock, 2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book *Visible Maths* Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in *Conceptual Maths* is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed *Conceptual Maths* also includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings *Geometry In Our Three-dimensional World* Alfred S

Posamentier, Guenter Maresch, Bernd Thaller, Christian Spreitzer, Robert Geretschlager, David Stuhlpfarrer, Christian Dorner, 2021-11-24 The book presents a comprehensive overview of various aspects of three dimensional geometry that can be experienced on a daily basis By covering the wide range of topics from the psychology of spatial perception to the principles of 3D modelling and printing from the invention of perspective by Renaissance artists to the art of Origami from polyhedral shapes to the theory of knots from patterns in space to the problem of optimal packing and from the problems of cartography to the geometry of solar and lunar eclipses this book provides deep insight into phenomena related to the

geometry of space and exposes incredible nuances that can enrich our lives The book is aimed at the general readership and provides more than 420 color illustrations that support the explanations and replace formal mathematical arguments with clear graphical representations avoid
