

Quick Review

- When you solve an equation you find the value of the variable that makes the equation true.

You can solve an equation by *systematic trial* or by *inspection*.

- Sharon baby-sits for an hourly wage. She works for 2 h and is given an extra \$3 as a tip. Sharon earns \$17. What is her hourly rate?

Let d dollars per hour represent Sharon's hourly rate.

Then $2 \times d$, or $2d$ is how much she earns for 2 h work.

Include the \$3 tip, then an equation that represents this situation is: $2d + 3 = 17$

Solve by Systematic Trial

$$2d + 3 = 17$$

Choose a value for d and substitute.

Try $d = 10$; then $2 \times 10 + 3 = 23$

Try $d = 5$; then $2 \times 5 + 3 = 13$

Try $d = 6$; then $2 \times 6 + 3 = 15$

Try $d = 7$; then $2 \times 7 + 3 = 17$

So, $d = 7$

Solve by Inspection

$$2d + 3 = 17$$

To solve the equation by inspection, ask yourself:

"Which number added to 3 gives 17?"

$$2d + 3 = 17$$

You know that $14 + 3 = 17$

$$\text{So, } 2d = 14$$

Then ask yourself, "Two times which number gives 14?"

You know that $2 \times 7 = 14$.

So, $d = 7$

Sharon earns \$7/h.

Tip

Each trial provides information to guide you in choosing a value for the next trial.

Math Makes Sense!: A Constructivist Approach To The Teaching And Learning Of Mathematics Ana Helvia Quintero, Hector Rosario, 2016-03-02 The methods for teaching mathematics usually follow the structure of mathematics The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics Based on research of how mathematics is actually learned this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics Math Makes Sense makes use of the realistic mathematics education RME philosophy which bridges the gap between informal mathematics learning such as in day to day life and more formal teaching in school Many real life situations as examples for learning are included as well as different mathematical and logic puzzles that will stimulate learning and foster understanding The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers instructors both in practice and those still in training private tutors homeschooling parents and educational researchers

Making Sense of Word Problems Eric de Corte, Brian Greer, Lieven Verschaffel, 2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems In Part One a wide range of examples documenting the strength of the phenomenon is reviewed Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre This theoretical shift is reflected in Part Two A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design

experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions about and strategies for doing word problems Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum **The ID CaseBook** Peggy A.
