Value-added Assessment in Practice Daniel F. McCaffrey, Laura S. Hamilton, 2007 Value added assessment VAA systems use statistical techniques to analyze test score data VAA data is intended to help educators make more informed decisions about curriculum and instruction The authors examined the rollout of Pennsylvania's VAA program and found that in its pilot phase the program had little effect on student achievement and received limited use by most principals and teachers at schools participating in the program The Essentials of Mathematics, K-6 Kathy Checkley, 2006-03-15 Using national and state standards to guide your math program is just a start You still have to decide how to apply the standards in your curriculum determine when students should learn different content and decide which programs and textbooks will help you make math come alive in the classroom That's where this new ASCD resource comes in Priorities in Practice The Essentials of Mathematics K-6 explores how educators from classroom teachers to central office administrators are tackling these major challenges in math education Emphasizing algebraic thinking problem solving and communication Relying on research to guide the implementation of new teaching practices Connecting math activities to larger purposes and everyday experiences Differentiating instruction based on students learning styles interests and readiness levels Helping teachers use classroom assessment to guide instruction Improving math teaching practices through teacher professional development and analysis of student work Whether you're working with an established math curriculum or rethinking your whole approach here's an opportunity to see where your program stands in the context of current trends This is the first volume in a new series from ASCD that explores tested methods of teaching and administering curriculum in the major content areas Note This product listing is for the reflowable ePub version of the book **Resources in Education**, 2001-04 Educational Assessment Robert J. Wright, 2008 Educational Tests and Measurements in the Age of Accountability is a core text for use in a first level graduate course in educational measurement and testing In addition to covering the topics traditionally found in core textbooks for this course this text also provides coverage of contemporary topics including national testing programs international achievement comparisons the value added assessment of schools and teachers and the public policy debate on selective admissions vs affirmative minority enrollment Teaching and Learning in an Era of Change, 1997 Research in Instructional Television and Film J. Thinking Practices in Mathematics and Science Learning James G. Greeno, Shelley V. Goldman, 2013-04-03 The term used in the title of this volume thinking practices evokes questions that the authors of the chapters within it begin to answer What are thinking practices What would schools and other learning settings look like if they were organized for the learning of thinking practices Are thinking practices general or do they differ by disciplines If there are differences what implications do those differences have for how we organize teaching and learning How do perspectives on learning cognition and culture affect the kinds of learning experiences children and adults have This volume describes advances that have been made toward answering these questions These advances involve several agendas including increasing interdisciplinary communication and collaboration reconciling research on cognition with research on teaching learning and school culture and strengthening the connections between research and school practice The term thinking practices is symbolic of a combination of theoretical perspectives that have contributed to the volume editors understanding of how people learn how they organize their thinking inside and across disciplines and how school learning might be better organized By touring through some of the perspectives on thinking and learning that have evolved into school learning designs Greeno and Goldman begin to establish a frame for what they are calling thinking practices This volume is a significant contribution to a topic that they believe will continue to emerge as a coherent body of scientific and educational research and practice
