Extended Graphical Calculus for Categorified Quantum $sl(2)$ Mikhail Khovanov, 2012 In an earlier paper Aaron D Lauda constructed a categorification of the Beilinson Lusztig MacPherson form of the quantum $sl(2)$ here he Khovanov Marco Mackaay and Marko Stosic enhance the graphical calculus he introduced to include two morphisms between divided powers one morphisms and their compositions They obtain explicit diagrammatical formulas for the decomposition of products of divided powers one morphisms as direct sums of indecomposable one morphisms which are in a bijection with the Lusztig canonical basis elements Their results show that one of Lauda's main results holds when the 2 category is defined over the ring of integers rather than over a field The study is not indexed Annotation 2012 Book News Inc Portland OR booknews.com
