Progress in Industrial Mathematics at ECMI 2014 Giovanni Russo, Vincenzo Capasso, Giuseppe Nicosia, Vittorio Romano, 2017-09-04 This book presents a collection of papers emphasizing applications of mathematical models and methods to real world problems of relevance for industry life science environment finance and so on The biannual Conference of ECMI the European Consortium of Mathematics in Industry held in 2014 focused on various aspects of industrial and applied mathematics The five main topics addressed at the conference were mathematical models in life science material science and semiconductors mathematical methods in the environment design automation and industrial applications and computational finance Several other topics have been treated such as among others optimization and inverse problems education numerical methods for stiff pdes model reduction imaging processing multi physics simulation mathematical models in textile industry The conference which brought together applied mathematicians and experts from industry provided a unique opportunity to exchange ideas problems and methodologies bridging the gap between mathematics and industry and contributing to the advancement of science and technology The conference has included a presentation of EU Maths In European Network of Mathematics for Industry and Innovation a recent joint initiative of ECMI and EMS The proceedings from this conference represent a snapshot of the current activity in industrial mathematics in Europe and are highly relevant to anybody

interested in the latest applications of mathematics to industrial problems **Medical Image Computing and Computer-Assisted Intervention - MICCAI 2014** Polina Golland, Nobuhiko Hata, Christian Barillot, Joachim Hornegger, Robert Howe, 2014-08-31 The three volume set LNCS 8673 8674 and 8675 constitutes the refereed proceedings of the 17th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2014 held in Boston MA USA in September 2014 Based on rigorous peer reviews the program committee carefully selected 253 revised papers from 862 submissions for presentation in three volumes The 100 papers included in the second volume have been organized in the following topical sections biophysical modeling and simulation atlas based transfer of boundary conditions for biomechanical simulation temporal and motion modeling computer aided diagnosis pediatric imaging endoscopy ultrasound imaging machine learning cardiovascular imaging intervention planning and guidance and brain *Commutative Algebra and Noncommutative Algebraic Geometry* David Eisenbud, Srikanth B. Iyengar, Anurag K. Singh, J. Toby Stafford, Michel Van den Bergh, 2015-11-19 This book surveys fundamental current topics in these two areas of research emphasising the lively interaction between them Volume 2 focuses on the most recent research Reform and Responsibility in the Remaking of the Swedish National Pension System Anette Nyqvist, 2016-04-08 Reform and Responsibility in the Remaking of the Swedish National Pension System is a detailed study through Sweden s national pension system With Sweden s recently reformed national pension system as the illustrative example Nyqvist shows how new forms of governance effectively shift responsibility from state level to an individual level She sheds light on how politicians

technocrats and bureaucrats work to educate and foster the general public into responsible hardworking and financially literate citizens This ethnographic example of how contemporary power works by way of new forms of governance Reform and Responsibility in the Remaking of the Swedish National Pension System is an exploration into the art of governing of a large scale governmental policy process Large Deviations and Asymptotic Methods in Finance Peter K. Friz,Jim Gatheral,Archil Gulisashvili,Antoine Jacquier,Josef Teichmann,2015-06-16 Topics covered in this volume large deviations differential geometry asymptotic expansions central limit theorems give a full picture of the current advances in the application of asymptotic methods in mathematical finance and thereby provide rigorous solutions to important mathematical and financial issues such as implied volatility asymptotics local volatility extrapolation systemic risk and volatility estimation This volume gathers together ground breaking results in this field by some of its leading experts Over the past decade asymptotic methods have played an increasingly important role in the study of the behaviour of financial models These methods provide a useful alternative to numerical methods in settings where the latter may lose accuracy in extremes such as small and large strikes and small maturities and lead to a clearer understanding of the behaviour of models and of the influence of parameters on this behaviour Graduate students researchers and practitioners will find this book very useful and the diversity of topics will appeal to people from mathematical finance probability theory and differential geometry

Parallel Computing: On the Road to Exascale G.R. Joubert, H. Leather, M. Parsons, 2016-04-28 As predicted by Gordon E Moore in 1965 the performance of computer processors increased at an exponential rate Nevertheless the increases in computing speeds of single processor machines were eventually curtailed by physical constraints This led to the development of parallel computing and whilst progress has been made in this field the complexities of parallel algorithm design the deficiencies of the available software development tools and the complexity of scheduling tasks over thousands and even millions of processing nodes represent a major challenge to the construction and use of more powerful parallel

systems This book presents the proceedings of the biennial International Conference on Parallel Computing ParCo2015 held in Edinburgh Scotland in September 2015 Topics covered include computer architecture and performance programming models and methods as well as applications The book also includes two invited talks and a number of mini symposia Exascale computing holds enormous promise in terms of increasing scientific knowledge acquisition and thus contributing to the future well being and prosperity of mankind A number of innovative approaches to the development and use of future high performance and high throughput systems are to be found in this book which will be of interest to all those whose work involves the handling and processing of large amounts of data Mathematical Reviews ,2002 INFORMS Conference Program Institute for Operations Research and the Management Sciences.
