Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven't done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students

The State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years Canada s public schools have been absorbed into a modern education system that functions much like Max Weber s infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year

becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions The State of the System explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada The State of the System issues a clarion call for more responsive engaged and accountable public schools

Now Mary Rice Hasson,Theresa Farnan,2018-08-14 Should we stay or should we go Millions of parents with children in public schools can t believe they re asking this question But they are And you should be asking it too Almost overnight America s public schools have become morally toxic And they are especially poisonous for the hearts and minds of children from religious families of every faith ordinary families who value traditional morality and plain old common sense Parents first duty is to their children to their intellect their character their souls The facts on the ground point to one conclusion get out now

Children of the Dream Rucker C. Johnson,2019-04-16 An acclaimed economist reveals that school integration efforts in the 1970s and 1980s were overwhelmingly successful and argues that we must renew our commitment to integration for the sake of all Americans We are frequently told that school integration was a social experiment doomed from the start But as Rucker C Johnson demonstrates in Children of the Dream it was in fact a spectacular achievement Drawing on longitudinal studies going back to the 1960s he shows that students who attended integrated and well funded schools were more successful in life than those who did not and this held true for children of all races Yet as a society we have given up on integration Since the high point of integration in 1988 we have regressed and segregation again prevails Contending that integrated well funded schools are the primary engine of social mobility Children of the Dream offers a radical new take on social policy It is essential reading in our divided times

How The Other Half Learns Robert Pondiscio,2020-06-02 An inside look at America s most controversial charter schools and the moral and political questions around public education and school choice The promise of public education is excellence for all But that promise has seldom been kept for low income children of color in America In How the Other Half Learns teacher and education journalist Robert Pondiscio focuses on Success Academy the network of controversial charter schools in New York City founded by Eva Moskowitz who has created

something unprecedented in American education a way for large numbers of engaged and ambitious low income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted Her results are astonishing her methods unorthodox Decades of well intended efforts to improve our schools and close the achievement gap have set equity and excellence at war with each other If you are wealthy with the means to pay private school tuition or move to an affluent community you can get your child into an excellent school But if you are poor and black or brown you have to settle for equity and a lecture about fairness About the need to be patient And about how school choice for you only damages public schools for everyone else Thousands of parents have chosen Success Academy and thousands more sit on waiting lists to get in But Moskowitz herself admits Success Academy is not for everyone and this raises uncomfortable questions we d rather not ask let alone answer What if the price of giving a first rate education to children least likely to receive it means acknowledging that you can t do it for everyone What if some problems are just too hard for schools alone to solve

Official Gazette Philippines,2004 **An Age of Accountability** John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree Legal and Ethical Issues in
