

The top portion of the book cover features a topographic map with a color gradient from green to blue, representing elevation. Overlaid on this map are two white line graphs. One line is relatively smooth, while the other is highly jagged and fluctuates significantly, suggesting seismic or geological data analysis.

Collecting, Processing and Presenting Geoscientific Information Martin H. Trauth, Elisabeth Sillmann, 2018-03-26 This second edition is an intensively revised and updated version of the book *MATLAB and Design Recipes for Earth Sciences* It aims to introduce students to the typical course followed by a data analysis project in earth sciences A project usually involves searching relevant literature reviewing and ranking published books and journal articles extracting relevant information from the literature in the form of text data or graphs searching and processing the relevant original data using MATLAB and compiling and presenting the results as posters abstracts and oral presentations using graphics design software The text of this book includes numerous examples on the use of internet resources on the visualization of data with MATLAB and on preparing scientific presentations As with the book *MATLAB Recipes for Earth Sciences* 4rd Edition 2015 which demonstrates the use of statistical and numerical methods on earth science data this book uses state of the art software packages including MATLAB and the Adobe Creative Suite to

process and present geoscientific information collected during the course of an earth science project The book s supplementary electronic material available online through the publisher s website includes color versions of all figures recipes with all the MATLAB commands featured in the book the example data exported MATLAB graphics and screenshots of the most important steps involved in processing the graphics **GPS Stochastic Modelling** Xiaoguang Luo,2013-07-06

Global Navigation Satellite Systems GNSS such as GPS have become an efficient reliable and standard tool for a wide range of applications However when processing GNSS data the stochastic model characterising the precision of observations and the correlations between them is usually simplified and incomplete leading to overly optimistic accuracy estimates This work extends the stochastic model using signal to noise ratio SNR measurements and time series analysis of observation residuals The proposed SNR based observation weighting model significantly improves the results of GPS data analysis while the temporal correlation of GPS observation noise can be efficiently described by means of autoregressive moving average ARMA processes Furthermore this work includes an up to date overview of the GNSS error effects and a comprehensive description of various mathematical methods **Choice** ,2006 *MATLAB® Recipes for Earth Sciences* Martin Trauth,2006-02-13

MATLAB is used in a wide range of applications in geosciences such as image processing in remote sensing generation and processing of digital elevation models and the analysis of time series This book introduces basic methods of data analysis in geosciences using MATLAB The text includes a brief description of each method and numerous examples demonstrating how MATLAB can be used on data sets from earth sciences All MATLAB recipes can be easily modified in order to analyse the reader s own data sets **American Book Publishing Record** ,2002 Who's Who in Science and Engineering 2008-2009 Who's Who Marquis,Marquis Who's Who,2007-12
