Some decades ago legal issues in medical practice never created any problem. A greater awareness is being created by adding doctor's services within the ambit of Consumer Protection Act 1986. Neither during the undergraduate training nor the postgraduate courses doctors have ever prepared themselves to deal with real world situations of litigation related to allegations of negligence. While facing litigation related to allegation of negligence in law courts for the first time a doctor realizes the importance of medical records, consent and expert witness and searches for help books. There are many books available for reference but this one is a handbook for practising doctors and their lawyers grappled with legal issues culminating in litigations covering a vast number of medical specialties and systems. This book proposes to fill the existing vacuum by creating authentic base required to understand the legal issues in medical practice in India. The esteemed contributors have put in their best efforts to share their knowledge, experience and wisdom with the readers by discussing various landmark legal decisions in the field of alleged medical negligence.
