Meaning And Textuality:

Meaning and Textuality François Rastier, Frank Collins, Paul Perron, 1997 Rastier proposes a theoretical framework for the semantic description and typology of texts establishing a critical debate among various streams of research before arriving at a synthesis of literary semiotics, thematics and linguistic semantics *A Theory of Textuality* Jorge J. E.

Gracia, 1995-07-01 This book is just what it says it is A theory of textuality divided into two parts logical and epistemological

Meaning and Reading Michel Meyer, 1983-01-01 According to the traditional view meaning presents itself under the form of some kind of identity To give the meaning of a sentence amounts to being capable of producing some substitute based on the identity of the terms of the sentence Is then the meaning of a book or of any text the capacity of rewriting it Instead of retaining a double standard theory of meaning one for sentences and another for texts that would allow for an ad hoc gap the author provides a unified conception called the question view of language he has developed known as problematology He pursues a systematic analysis of questioning in literature and shows how questioning makes the understanding process possible *Translation as Text* Albrecht Neubert, Gregory M. Shreve, 1992 The basic tenet here is that we do not translate words but texts and that these competing models can be integrated into a more global theory of translation by viewing the translation process as a primarily textual process The authors examine in detail the characteristics that make a good translation a text focusing particularly on the empirical relationship between the theory of translation and its practice

design Fully indexed for the first time **The Event of Meaning in Gadamer's Hermeneutics** Carlo DaVia,Greg Lynch,2024-02-06 This book presents the first detailed treatment of Gadamer s account of the nature of meaning It argues both that this account is philosophically valuable in its own right and that understanding it sheds new light on his wider hermeneutical project Whereas philosophers have typically thought of meanings as belonging to a special class of objects the central claim of Gadamer s view is that meanings are events Instead of a pre existing content that we must unearth through our interpretive efforts for Gadamer the meaning of a text is what happens when we encounter it in the appropriate way In events of meaning the world makes itself intelligibly present to us in a manner that is uniquely and irreducibly bound up with the concrete situation in which we find ourselves When we recognize that Gadamer thinks of meaning in this way we are better positioned to appreciate what his wider views amount to and how they hang together Gadamer s accounts of interpretive normativity the aspectual character of understanding and the nature of essences for example snap into more vivid relief when we see them as outgrowths of his underlying conception of meanings as events The Event of Meaning in Gadamer s Hermeneutics will especially appeal to researchers and advanced students working in hermeneutics phenomenology and the philosophy of language More broadly it will be of interest to humanities teachers and researchers concerned with the question of how texts from distant cultures can be relevant to readers here and now **The Idea of a Text and the Nature of Textual Meaning** Anders Pettersson,2017-04-15 In his account of text and textual meaning Pettersson demonstrates that a text as commonly conceived is not only a verbal structure but also a physical entity two kinds of phenomena which do not in fact add up to a unitary object He describes this current notion of text as convenient enough for many practical purposes but inadequate in discussions of a theoretically more demanding nature Having clearly demonstrated its intellectual drawbacks he develops an alternative boldly revisionary way of thinking about text and textual meaning His careful argument is in challenging dialogue with assumptions about language in use to be found in a wide range of present day literary theory linguistics philosophical aesthetics and philosophy of language **Dictionary for Theological Interpretation of the Bible** Kevin J. Vanhoozer,2005-11 This groundbreaking reference tool introduces key names theories and concepts for interpreting Scripture *The Textual Condition* Jerome J. McGann,2020-09-01 Over the past decade literary critic and editor Jerome McGann has developed a theory of textuality based in writing and production rather than in reading and interpretation These new essays extend his investigations of the instability of the physical text McGann shows how every text enters the world under socio historical conditions that set the stage for a ceaseless process of textual development and mutation Arguing that textuality is a matter of inscription and articulation he explores texts as material and social phenomena as particular kinds of acts McGann links his study to contextual and institutional studies of literary works as they are generated over time by authors editors typographers book designers marketing planners and other publishing agents This enables him to examine issues of textual stability and instability in the arenas of textual production

and reproduction Drawing on literary examples from the past two centuries including works by Byron Blake Morris Yeats Joyce and especially Pound McGann applies his theory to key problems facing anyone who studies texts and textuality

Textual Parameters in Older Languages Susan C. Herring, Pieter Th. van Reenen, Lene Schøsler, 2000-01-01 *Textual Parameters in Older Languages* takes a contemporary approach to the inherent limitations of using older texts as data for linguistic analysis drawing on methods of text analysis pragmatics and sociolinguistics to supplement traditional historical and philological methods The focus of the book is on the importance of controlling for textual parameters defined by the editors as dimensions of variation associated with texts and their production including text type degree of poeticality orality and dialect in the analysis of older language data Failure to do so can result in invalid generalizations recognizing the influence of textual parameters conversely raises a myriad of issues for the practice and theory of historical linguistics The 12 essays in this collection apply this approach in analyses of anaphora non finite verbal forms particles punctuation word order and other phenomena in a wide range of languages including Ancient Tamil Sanskrit Latin Heian Japanese Medieval Greek Old French Old Russian Middle English and Modern Danish An in depth introduction by the editors lays out the goals of the textual parameters approach and considers the methodological and theoretical consequences of the evidence presented in the book as a whole
