Theoretical Issues in Reading Comprehension Rand J. Spiro,Bertram C. Bruce,William F. Brewer,2017-11-03 Research in cognitive psychology linguistics and artificial intelligence the three disciplines that have the most direct application to an understanding of the mental processes in reading is presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond

simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines

Conversations of the Mind Rebecca William Mlynarczyk, 2013-10-18 Asking students to write journals that reflect on their learning has become a widespread pedagogical practice in recent years However the scholarly literature does not address certain key questions about how journal writing aids learning Is there something inherent in journal writing that encourages students to write reflectively What psycholinguistic or cognitive factors help to explain the power of journal writing Why do some students use journals to write prolifically and creatively while others limit their responses to summarizing the assigned course reading Why do teachers find some journal entries so much more engaging than others How do teachers ways of responding to journals affect their students development as writers and thinkers This book addresses such questions through a careful analysis of the journal writing of the students in the author s ESL classes at a large urban college It contains detailed case studies of five culturally and linguistically diverse students with widely differing responses to journal writing To teachers of composition for both first and second language students and to teachers of graduate courses in education and qualitative research this book offers a contextualized description of journal writings as a complex social activity By emphasizing the need for educators to reexamine their pedagogy and to learn from their students *Conversations of the Mind* is an indispensable contribution to the emerging literature of teacher research and reflective practice

Making Citizens Beth C. Rubin, 2012 Can social studies classrooms be effective makers of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy *Making Citizens* illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms The book explains why social studies teachers particularly those working in diverse and urban areas should infuse civic education into their teaching and outlines how this can be done effectively Directed at both pre service and in service social studies teachers and designed for easy integration into social studies methods courses this book follows students and teachers in social studies classrooms as they experience a new approach to the traditional history oriented social studies curriculum using themes essential questions discussion writing current events and action research to explore enduring civic questions Following the experiences of three teachers working at three diverse high schools Beth C Rubin considers how social studies classrooms might become places where young people study ponder discuss and write about relevant civic questions while they learn history She draws upon the latest sociocultural theories on youth civic identity development to describe a field tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers

Guided Inquiry Design® Carol C. Kuhlthau, Leslie K. Maniotes, Ann K. Caspari, 2012-06-06 Today's students need to be fully prepared for successful learning and living in the information age. This book provides a practical flexible framework for designing Guided Inquiry that helps achieve that goal. Guided Inquiry prepares today's learners for an uncertain future by providing the education that enables them to make meaning of myriad sources of information in a rapidly evolving world. The companion book *Guided Inquiry Learning in the 21st Century* explains what Guided Inquiry is and why it is now essential now. This book *Guided Inquiry Design: A Framework for Inquiry in Your School* explains how to do it. The first three chapters provide an overview of the Guided Inquiry design framework, identify the eight phases of the Guided Inquiry process, summarize the research that grounds Guided Inquiry, and describe the five tools of inquiry that are essential to implementation. The following chapters detail the eight phases in the Guided Inquiry design process, providing examples at all levels from pre-K through 12th grade and concluding with recommendations for building Guided Inquiry in your school. The book is for pre-K-12 teachers, school librarians, and principals who are interested in and actively designing an inquiry approach to curricular learning that incorporates a wide range of resources from the library, the Internet, and the community. Staff of community resources, museum educators, and public librarians will also find the book useful for achieving student learning goals.

Just RISE UP! Sarah Francis Martin, InScribed, 2014-10-14 Sarah remembers the exact moment when the relationship between her faith and her entire life came into clear focus. Sitting in her favorite red chair with a comfy blanket and a cup of hot tea, she snuggled in with her Bible and a new book. The book was huge, several hundred pages long, and yet it didn't intimidate her. Written by the beloved Chuck Colson, *How Now Shall We Live* focused the lens of Sarah's life and spelled out a segregation that she had unknowingly been living with: a segregation between her faith and the rest of her life. She has since come to understand that The Lord designed each and every one of us uniquely and put a dream in our heart that is attached to His agenda for this world. Many of us have felt the stirring in our heart to make a difference with our life, yet we don't always know how. The key she found was to surrender to God's leading, seek him first, and allow him to do the big things. He has planned with our life. In the end, God's agenda and our dreams and passions will intersect around one very important phrase: a battle cry if you will. *Make Jesus Famous*. Based on Psalm 145, this invigorating study motivates women to do life differently by making Jesus famous in all aspects of life. *Just RISE UP* is a call to get off the couch of complacency, live a life of praise with a humble posture and Kingdom perspective, and step into a life of true purpose. Features include: Verse by verse study of Psalm 145; Snippets of conversations with Sarah's readers; Journaling prompts to help the reader dig deeper; Conversation guide for small groups.
