Mathematics Advanced Subsidiary PAPER 21: Statistics									
You must have: Mathematical Formulae and Statistical Tables (Green), calculator								Total Marks	

Candidates may use any calculator allowed by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear.
Answers without working may not gain full credit.
- Values from statistical tables should be quoted in full. If a calculator is used instead of tables the value should be given to an equivalent degree of accuracy.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- The total mark for this part of the examination is 30. There are 5 questions.
- The marks for **each** question are shown in brackets.
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Tax Planning

2013/14 Mark McLaughlin, 2013-08-20 New planning strategies and tax saving opportunities Tax Planning 2013 14 covers the many situations and tax planning opportunities that practitioners encounter everyday when dealing with their clients tax affairs Written by some of the UK s leading tax specialists and experienced authors this book clearly and concisely explains key tax planning ideas and concepts and is fully updated to the latest Finance Act This book is full of easily implementable technical suggestions and advice It outlines the planning opportunities and potential pitfalls concerning specific transactions and circumstances and demonstrates how to successfully organise and structure the finances of individuals trusts and unincorporated businesses and companies Practical and user friendly it contains worked examples throughout and the short paragraphs and bullet point style will help you to locate the information you need quickly and efficiently Contributors include tax experts Jennifer Adams John Baldry David Brookes Rebecca Cave George Duncan Toby Harris Robert Maas Partha Ray and Alec Ure This tax planning title concentrates on key areas of tax planning which are of greater relevance to the tax practitioner on a day to day basis Previous ISBN 9781847669704 *Advances in Fluid-Structure Interaction* Marianna Braza, Alessandro Bottaro, Mark Thompson, 2016-04-07 This book addresses flow separation within the context of fluid structure interaction phenomena Here new findings from two research communities focusing on fluids and structures are brought together emphasizing the importance of a unified multidisciplinary approach The book covers the theory experimental findings numerical simulations and modeling in fluid dynamics and structural mechanics for both incompressible and compressible separated unsteady flows There is a focus on the morphing of lifting structures in order to increase their aerodynamic and or hydrodynamic performances to control separation and to reduce noise as well as to inspire the design of novel structures The different chapters are based on contributions presented at the ERCOFTAC Symposium on Unsteady Separation in Fluid Structure Interaction held in Mykonos Greece 17 21 June 2013 and include extended discussions and new highlights The book is intended for students researchers and practitioners in the broad field of computational fluid dynamics and computational structural mechanics It aims at supporting them while dealing with practical issues such as developing control strategies for unsteady separation and applying smart materials and biomimetic approaches for design and control *Grading for Growth* David Clark, Robert Talbert, 2023-07-03 Are you satisfied with your current and traditional grading system Does it accurately reflect your students learning and progress Can it be gamed Does it lead to grade grubbing and friction with your students The authors of this book two professors of mathematics with input from colleagues across disciplines and institutions offer readers a fundamentally more effective and authentic approach to grading that they have implemented for over a decade Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement the authors offer alternative strategies that encourage revision and growth Alternative grading is concerned with students eventual level of understanding This leads to big changes Students take time to review past failures and learn from them Conversations shift from why did I

lose a point for this to productive discussions of content and process Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi section lectures This book offers a comprehensive introduction to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice

The DNA, RNA, and Histone Methylomes Stefan Jurga, Jan Barciszewski, 2019-08-28 This book reviews the chemical regulatory and physiological mechanisms of protein arginine and lysine methyltransferases as well as nucleic acid methylations and methylating enzymes Protein and nucleic acid methylation play key and diverse roles in cellular signalling and regulating macromolecular cell functions Protein arginine and lysine methyltransferases are the predominant enzymes that catalyse S adenosylmethionine SAM dependent methylation of protein substrates These enzymes catalyse a nucleophilic substitution of a methyl group to an arginine or lysine side chain nitrogen N atom Cells also have additional protein methyltransferases which target other amino acids in peptidyl side chains or N termini and C termini such as glutamate glutamine and histidine All these protein methyltransferases use a similar mechanism In contrast nucleic acids DNA and RNA are substrates for methylating enzymes which employ various chemical mechanisms to methylate nucleosides at nitrogen N oxygen O and carbon C atoms This book illustrates how thanks to there ability to expand their repertoire of functions to the modified substrates protein and nucleic acid methylation processes play a key role in cells

Materializing the Foundations of Quantum Mechanics Climério Paulo da Silva Neto,2023-05-24 This book offers a history of the instrumentation used to materialize the early thought experiments devised in the Einstein Bohr disputes over the foundations of quantum mechanics It shows how the second world war and cold war fostered the development of materials instruments and systems that made it possible to create manipulate and detect single quantum systems thus creating the material conditions for experiments in foundations of quantum mechanics and for a broad spectrum of experimental inquiries on the structure and properties of matter which underlay the creation of new research fields such as quantum optics quantum information and atomic molecular and optical physics Discussing research and development performed in diverse contexts this book reveals how physicists carried instruments and the knowledge they embodied through disciplinary and geographic frontiers to probe entanglement a most intriguing feature of the quantum world *Federal Register* ,2013-05 [Ships and Offshore Structures XIX](#) Carlos Guedes Soares,Y.
