Courtyard Housing for Health and Happiness Donia Zhang, 2016-03-09
 Health and happiness are fundamental to human quality of life. The United Nations World Happiness Report 2012 reflects a new worldwide call for governments to include happiness as a criterion to their policies. The Healthy Cities or Happy Cities movement has been endorsed by the WHO since 1986 and a Healthy House or Happy Home is a critical constituent of a healthy city or a happy city. Nevertheless, the concept has not been fully explored. Existing literature on the healthy house has often focused on the technical, economic, environmental, or biochemical aspects, while current scholarship on the happy home commonly centers on interior decoration. Few studies have addressed the importance of social and cultural factors that affect the health and happiness of the occupants. Identifying four key themes in Chinese philosophy to promote health and happiness at home, this book links architecture with Chinese philosophy, social sciences, and the humanities, and in doing so, argues that Architectural Multiculturalism is a vital ideology to guide housing design in North America. Using both qualitative and quantitative evidence gathered from ethnic Chinese and non-Chinese living in the USA and Canada, the study proposes that the Courtyard is a central component to promote social and cultural health and happiness of residents. It further details courtyard garden house design strategies that combine a sense of privacy with a feeling of community as represented in courtyard housing. The schemes may have universal implications.

Innovations in the Industrial Internet of Things (IIoT) and Smart Factory Goundar, Sam, Avaniya, J., Sunitha, Gurram, Madhavi, K. Reddy, Bhushan, S. Bharath, 2021-01-22
 Industrial Internet of Things (IIoT) is changing the face of industry by completely redefining the way stakeholders, enterprises, and machines connect and interact with each other in the industrial digital ecosystem. Smart and connected factories, in which all the machinery transmits real-time data, enable industrial data analytics for improving operational efficiency, productivity, and industrial processes, thus creating new business opportunities, asset utilization, and connected services. IIoT leads factories to step out of legacy environments and arcane processes towards open digital industrial ecosystems. *Innovations in the Industrial Internet of Things (IIoT) and Smart Factory* is a pivotal reference source that discusses the development of models and algorithms for predictive control of industrial operations and focuses on optimization of industrial operational efficiency, rationalization, automation, and maintenance. While highlighting topics such as artificial intelligence, cyber security, and data collection, this book is ideally designed for engineers, manufacturers, industrialists, managers, IT consultants, practitioners, students, researchers, and industrial industry professionals.
