Financial Accounting and Management Control Fredrik Nilsson, Anna-Karin Stockenstrand, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation The aim of management control on the other hand is to give the board senior executives and employees unique information for strategy formulation and implementation One often mentioned negative effect is the risk of financial accounting affecting management control design and use making it less relevant for decision making at the company level The book provides an analysis of the complex relationship between financial accounting and management control The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but

also the control system An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book

Modern ERP: Select, Implement, and Use Today's Advanced Business Systems Marianne Bradford, 2014-12-17 Modern ERP can be used in an undergraduate or graduate enterprise resource planning systems course or to support an ERP module in information systems accounting business or supply chain courses This third edition continues to be vendor agnostic and has been substantially revised to keep pace with advances in the ERP marketplace New topics include cloud computing mobility and business analytics while ERP security ERP risk management databases and supply chain have been expanded Innovative graphics and ERP screenshots have been incorporated to further aid in the learning process

Managing Technology and Innovation Robert Verburg, J. Roland Ortt, Willemijn M. Dicke, 2006-06-19 Modern technology and innovation are vital to the success of all companies be they hi tech firms or companies seemingly unaffected by technology and innovation whether established firms or business start ups This book focuses on understanding technology as a corporate resource covering product development design of systems and the managerial aspects of new and high technology Topics investigated include the internal organization of high technology firms the management of technology in society managing innovation dilemmas and strategies The wide ranging experience of the teachers and experts contributing to this book has resulted in an integrated multi disciplinary textbook that provides an introductory overview to managing technology and innovation in the twenty first century This text is essential reading for students of business and engineering concerned with technology and innovation management
