The College Stress Test Robert Zemsky, Susan Shaman, Susan Campbell Baldrige, 2020-02-25 Provides an insightful analysis of the market stresses that threaten the viability of some of America's colleges and universities while delivering a powerful predictive tool to measure an institution's risk of closure In *The College Stress Test* Robert Zemsky Susan Shaman and Susan Campbell Baldrige present readers with a full frank and informed discussion about college and university closures Drawing on the massive institutional data set available from IPEDS the Integrated Postsecondary Education Data System they build a stress test for estimating the market viability of more than 2 800 undergraduate institutions They examine four key variables new student enrollments net cash price student retention and major external funding to gauge whether an institution is potentially at risk of considering closure or merging with another school They also assess student body demographics to see which students are commonly served by institutions experiencing market stress The book's appendix includes a powerful do it yourself tool that institutions can apply using their own IPEDS data to understand their level of risk The book's underlying statistical analysis makes clear that closings will not be nearly as prevalent as many prognosticators are predicting and will in fact impact relatively few students The authors argue that just 10 percent or fewer of the nation's colleges and universities face substantial market risk while 60 percent face little or no market risk The remaining 30 percent of institutions the authors find are bound to struggle To thrive the book advises these schools will need to reconsider the curricula they deliver the prices they charge and their willingness to experiment with new modes of instruction The *College Stress Test* provides an urgently needed road map at a moment when the higher education terrain is shifting Those interested in and responsible for the fate of these institutions will find in this book a clearly defined set of risk indicators a methodology for monitoring progress over time and an evidence based understanding of where they reside in the landscape of institutional risk

First 100 Days of President Obama David J. Phillips, 2009-05 The swooning frenzy over Barack Obama as President of the United States is an artificially created absurd wave of self deception His cult following is bereft of reason and devoid of facts He is a celebrity in the mold of an intelligent articulate Paris Hilton In no way does he resemble a statesman Each day in the age of Obama takes us further into lawlessness situational constitutionalism and institutional derangement We are turning into a banana republic where the rule of law is replaced by the tyranny of the majority The political machination of Liberals in the name of an economic recession that they are manipulating is undermining our founding principles President Obama is accumulating massive power in Washington justified by the need to save the nation with a whirlwind of activity He is recklessly over compensating throwing trillions of dollars around for a quick fix which will be a millstone around the necks of future generations He then dishonestly claims that the USA will arise stronger than before When traveling abroad President Obama has an arrogant humility He portrays a proud but flawed United States using a refrain of past mistakes of his predecessor to generate personal popularity He talks about the nation's darker periods of slavery and repression and its past sanction of torture that he has ended Chicago Politics have come to the White House No president in the past 40 years
