

### Determining Epicenter Location - Practice

1. Determine start time for P & S wave using the seismogram.
2. Calculate the difference in arrival time (subtract the times).

Arrival Times		Difference in Arrival Time	Distance to Epicenter
P waves	S waves		

3. Using the difference in KT, determine the distance to the epicenter on a P-S wave time travel graph. (Use your compass!) Adjust your compass so the width is the same size as the difference in arrival time. Slide your compass up on the graph to find the point where the P & S lines aligned with the width of your compass. Read down the chart to determine the distance.

4. Draw the radius with calculated distance for each station - from step 43. Use your compass and the map scale to get the correct distance.
